

Client: Keystone Projects  
Sector: New Build - Residential

### Challenge

To propose product solutions which met the project's aesthetic and cost considerations through digital visualisations that would assist with planning approval and material specification.

### Solution

- Utilise product knowledge and landscape design expertise to create product solutions which met the brief
- 2D and 3D digital visualisation to demonstrate a realistic look and feel of the completed project and support Keystone Projects in delivering the solution to the client
- Produce a schedule of materials to aid accurate pricing and ordering
- Supporting collateral and samples

### Outcome

- Engagement with the customer from design stage to completion
