

Marshalls

Transport Policy Statement

Transportation is vital for the supply of incoming raw materials and the delivery of finished products to our customers. It represents a significant proportion of our operating costs and scope 1 greenhouse gas emissions (“GHG”). This policy is consistent with our sustainability strategy and supports our vision by helping us to operate our business, as market leaders, in a responsible manner.

Marshalls’ logistics functions aims to operate safely whilst minimising pollution and waste through measurable and sustainable improvement.

This policy statement, its associated targets and reporting apply to Marshalls’ own fleet of Large Commercial Vehicles (“LGV”) and cover our direct and indirect environmental impacts.

This policy applies to all Marshalls businesses and requires Marshalls to:

- Set Group wide targets appropriate to the nature and scale of our operations.
- Monitor and measure performance of our Logistics operation.
- Consider, engage and communicate with all interested parties where applicable.
- Establish, monitor and measure continual improvement initiatives in relation to the fleet.

In order to achieve our targets we will:

- Invest in the latest vehicles to improve MPG.
- Use the latest tracking and routing software to improve efficiency.
- Deliver driver training through the use of telematics to target key issues this will focus on mpg, harsh braking and harsh acceleration.
- Investigate best practice and alternative fuels when appropriate.

This policy statement will be reviewed and where required at least on an annual basis.
