Environmental Policy

Marshalls plc ("Group) is committed to continuously improving its environmental performance and to providing positive contributions by our business that reduce our environmental impact. We are committed to sustainable development that meets the needs of the present without compromising the ability of future generations to meet their own needs.

We are committed to responsible stewardship of the natural environment. Recognising the environmental implications of our activities providing products and services to our customers, we are continuously striving to improve environmental performance by setting and reviewing measurable objectives and targets associated with our operations. We seek to minimise natural resources consumption, water usage, waste and adverse environmental impacts, while optimising the use of technology and pursuing the achievement of our strategic objectives.

In pursuit of this environmental policy, we are committed to the following:

- determining, understanding and implementing relevant environmental legislation to fulfil our legal obligations;
- developing adaptation and mitigation strategies against internal and external factors that could have adverse impacts on the environment or the business;
- setting business-wide objectives and targets appropriate to the nature and scale of our activities;
- maintaining and continuously improving our environmental management system and improving awareness and training in relation to environmental protection and performance;
- continuously improving environmental performance by monitoring and measuring improvement initiatives, particularly in relation to water resources, through recycling, capture and discharge and reduction in waste generated that is sent to landfill;
- protecting and enhancing the natural environment, both within our landholdings and the wider corridor where possible;
- recognising the need for sympathetic restoration and after-use of quarry and other
 operational sites and considering the character of the local environment and the
 concerns of the local community and other stakeholders when planning such matters.
- considering the environmental impacts associated with our products throughout their life cycle by efficient resource use;
- prevention of pollution to the environment from our activities;
- ensuring the business has the necessary knowledge, resources and workforce skills to maximise its contribution to the protection of the environment;
- considering and appropriately engaging and communicating with interested parties;
 and
- reviewing the Group's targets and Policy annually against business objectives and commitments given to industry initiatives and wider stakeholders.

Environmental Policy

We are committed to meeting the requirements of the ISO 14001 Environmental Management System.

In 2024, we will be reviewing and merging Marshalls and Marley in to a single set of policies that will apply to the whole of the Group. Until we've completed this, any reference in this policy to "we", "our", "Marshalls" or "the Group" does not necessarily include Marley.

This policy will be reviewed annually as part of the management review process.

Martyn Coffey, CEO January 2024
