# ARMED AND READY WITH NEW PRODUCT

As the leading innovator of landscaping solutions for the commercial construction sector, Marshall's has continued to create, inspire and develop during the recent economic downturn. It has been a difficult few years for our industry, but now that the green shoots of recovery are making an appearance, we are poised to bring to market a distinctive range of new products guaranteed to enhance landscape construction. Marshall's innovations combine clever engineering and technology with imaginative ways to save time and costs across all disciplines, from water management to the very latest in creative street furniture ideas.

Our company and our people are equipped and more than ready to make the most of emerging commercial opportunities. Marshall's landscaping expertise has no parallel in the industry, demonstrated by our thoughtful and comprehensive range of product solutions for landscaping projects.

# INTERNAL NATURAL STONE. QUALITY,

# DESIRABLE, DISTINCTIVE, INTERNATIONAL

Building on over 120 years experience of quarrying and processing natural stone combined with a wealth of experience in sourcing stones from around the world, Marshalls is delighted to be launching their Internal Stone Flooring Collection for the commercial market.

The Collection is built from the highest quality materials, sourced from a wide family of stones including Marble, Limestone, Travertine, Quartzite, Granite and Sandstone. An easy to use colour finding index has been produced to assist clients in their decision making process, an approach common within interior design. The colour spectrums are available for all three finishes; polished, fine finished and textured.

With over 50 large commercial schemes already completed around the UK, Marshalls has proved itself as a successful and valued supplier for internal flooring.

Many of the schemes are showcased within our 'Stone Collection' book. This 200 page hard back book showcases this beautiful collection of world stones for internal flooring. The book is structured for interior designers and echoes the style and quality of the swatch guides widely used for selecting internal materials.

- 1/ Devonshire Square, London
- 2/ Universal Square, Manchester
- 3/ Drake Circus, Plymouth
- 4/ One New Change, London
- 5/ Met Quarter, Liverpool
- 6/ Cabot Circus, Bristol
- 7/ Midlands Arts Centre Birmingham
- 8/ Central Conference Complex, Manchester

Our Aim:

- To provide an attractive and distinctive internal flooring proposition with desirable differentiated materials
- To use the strength and robustness of the Marshalls supply chain to bring together an unmatched collection of world stones that will inspire
- Marshalls brand is built on quality and service, traits that will appeal to internal build programmes thereby providing certainty and eliminating risk

For more information on the Stone Collection book call 01270 824 000 or go online to:

*Creating Better Landscapes*

**MONO BEANY. INNOVATIVE, ONE PIECE,**

# STRONG, EASIER, SIMPLER, QUICKER

45° Splay

Half Battered

Sealant Groove

The growing demand for more cost-effective and less complicated drainage systems has led to modern linear drainage becoming the preferred choice amongst specifiers and contractors.

Marshalls new Mono Beany - a concrete one piece combined kerb and drainage system demonstrates our commitment to developing water management solutions that offer clients choice and practitioners benefits.

Mono Beany is an extension of our original Beany Block, and alongside Mini Beany this new addition not only complements but completes our comprehensive Beany range of water management solutions.

Mono Beany was specifically designed and developed to form an integral part of any modern, sustainable water management solution. This one piece system is simple and straightforward to design and easy to set out and install. Cost effective and flexible with excellent surface drainage efficiency specifically designed for low to medium flow capacity. The inlet apertures have a 45° incline which prevents blockages and creates aesthetic consistency across the range.

- Genuine advanced concrete mix technology, M-Tech, provides increased strength with less material
- High strength M-Tech concrete surrounds a unique rotational moulded 100% recycled plastic core
- Mono Beany is available in Half Battered or 45° Splay profiles and a choice of two depths
- New design provides reduced flow resistance
- Achieves D400 load classification for use on any urban or rural carriageway
- Mono Beany operates with a comprehensive range of system ancillaries
- One mechanical lift per metre means quicker, more cost effective installation
- Requires less installation haunch than competitor products
- Mono Beany carries the British Standard Kitemark, and is certified to BS EN 1433

#### Dimensions:

500 & 1000mm lengths

321 & 502mm depths

**SLOT DRAIN DUO. EFFICIENT, DISCREET,**

# VALUE ENGINEERED

New Slot Drain Duo is a simple value engineered linear drainage solution for schemes where discreet drainage is paramount.

We're experiencing a growth in demand amongst specifiers and contractors for more cost-effective, less complicated and more aesthetically driven linear drainage systems.

Slot Drain provides a discreet and efficient linear solution for a wide range of applications from prestigious pedestrian areas through to motorway crossovers. Perfect for complementing premium concrete paving and Natural Stone projects, Slot Drain Duo has now been value engineered to offer a more cost effective system.

- Now both Mono and Duo Slot Drain tops sit on our existing Landscape Drain Channel to help drive out cost
- Landscape Drain Channels offer a variety of invert depths and a full range of accessories
- Load Classification of D400 suits trafficked applications
- Slot Drain Duo, suits prestigious pedestrian schemes through to motorway crossovers
- Ideal where discreet yet efficient linear drainage is required

**CONSERVATION PRIORA®. TRAFFICABLE,**

Featuring the patented Piora  
nib for maximum interlock

# SuDS, PERMEABLE, LARGE SIZES, DESIGN LED

## SUB-BASE COMPONENTS

### 6mm & 20mm Priora Aggregate

Specially selected for maximum hydraulic and structural performance

### M15 Grid

Stabilises the sub-base increasing the CBR by 1% and driving cost from the system

### M380 Tanking Membrane

Thinner, lighter and stronger for lining Type C (tanked) Priora Systems

Marshalls Priora Permeable Paving system is the best selling permeable paving in the UK. Driven by evolving legislation and a growing interest in sustainable building practices, sales have grown consistently since its launch in 2002.

To capitalise on our success and to further maximise the appeal of our permeable offer, we are now proud to launch our new flag-sized Conservation Priora.

Based on our most popular value-added flag product, this new member of the Priora product family features a range of 3 complementary large plan size units that mirrors the usage patterns of our standard flag products.

- Permeable enough to cope with any realistic UK rainfall event, even in single size large unit laying patterns
- Ideal for pedestrianised areas, but engineered and tested to withstand light trafficking (cars) and occasional emergency vehicles up to 8 tonnes
- Employs the patented Priora nib, successfully installed for over 10 years, to maximise interlock stability
- The three complementary sizes interlock to create multi-size, truly random course laying patterns, but can also create single-size half bond options
- The three contemporary colour finishes can be mixed and matched to enable truly creative paving designs

### Conservation Textured Priora Dimensions:

200 x 400 x 65mm

400 x 400 x 65mm

600 x 400 x 65mm

WATER MANAGEMENT  
PERMEABLE

**Marshall's**

*Creating Better Landscapes*

**METRE SQUARE UNITS. UNIQUE, BOLD,**

# PROGRESSIVE, AESTHETIC, TRAFFICABLE

Marshalls always strive to innovate and develop new markets for their core product ranges, and paving is no exception. In response to market requests and trends for larger plan sizes Marshalls are unique in being able to satisfy customer demands.

This top end value product is an extension to our most popular textured paving ranges - Saxon and Conservation. It can be laid with a flexible laying course and sanded joints of 2-5mm. It is the strength of this specially created concrete mix that allows large plan sizes to be trafficked.

- Innovative concrete technology allows paving on a grand scale
- Aesthetically suits large areas and capitalises on the trend for large plan sizes
- Installation time and costs are significantly reduced
- The product can be laid with a flexible laying course and sand joints of 2-5mm, for pedestrian use, occasional light vehicle use of upto 7.5 tonnes. For more heavily trafficked applications, please contact Marshalls for installation advise.

# PC40. COST EFFECTIVE, INNOVATIVE

## PC40 COMBINED COPING TACTILE UNIT

No other manufacturer is offering a DDA compliant Combined Concrete Coping and Tactile Unit. It creates a product solution that addresses all of the clients' technical issues with an innovative one piece unit.

- Innovative dual pour concrete technology creates a single combined coping and tactile unit
- DDA compliant
- Single unit is easier and quicker to install
  - Negates requirement for steel preparation works under platform
  - Consistent alignment aids aesthetic result

### Dimensions:

600 x 1000 x 65mm

### Colours:

Tactile: Natural, Buff, Charcoal

Coping: Natural, Buff, Charcoal

# INTERNAL PAVING. INNOVATIVE

## INTERNAL PAVING

Marshalls has used its extensive experience of manufacturing external paving to apply this knowledge to the manufacture of internal flooring. This product was first developed for London Underground. It is a product with tighter construction tolerances and as a result more consistent installation aesthetics.

- Developed and approved for London Underground
- Pioneering the future for internal concrete paving
- UK manufacture means improved availability, better lead times and reduced potential for transit damage
- Smooth light polish highlights the rich mix of aggregates, making it ideal for internal applications
- No secondary processing of the product is required on site, unlike many of the current market solutions in place for internal flooring. This improves site health and safety and reduces installation costs

### Dimensions:

300 x 300 x 28mm

400 x 400 x 35mm

600 x 300 x 35mm

**STONESPAR™. THIN, STRONG, UNIQUE,**

# ETHICALLY SOURCED, PRE-BLENDED TONES

NATURAL  
STONE

2013 sees the introduction of a new concept for stone paving using five amazing new sandstones in an innovating and exciting design led vision for paving. This new combination of colours, size and designs marks a new era for Natural Stone landscapes.

Jayrum Light

Salva Grey

Chaler Beige

Ranya Brown

Aruva Red

- Stonespar consists of 5 stones which are exclusive to Marshalls
- Stonespar takes the risk out of colour variation and provides designers with exactly what their clients require
- Also available in 4 pre-designed mixes offering several key benefits:
  - Pre-mixed in the crates to the exact design proportions ensures consistency of the blend when laid
  - Pre-blended mixes mean that space on site is minimised as only one crate is required at the laying face
  - Bespoke mixed blends can also be created and supplied for projects
- Units weigh approximately 13kg each so manual handling problems on site are minimal

#### Dimensions:

600 x 130 x 65mm

#### PRE-DESIGNED MIXES

*Creating Better Landscapes*

**STONESPAR™**

### **SHOULDERS THE BURDEN OF MODERN LANDSCAPES**

Marshalls Stonespar range when installed to the British Standards is capable of carrying the burden of the modern landscape. Most landscapes have a certain degree of vehicular overrun or have a degree of shared space for deliveries. Correctly installed Stonespar will carry a class 4 loading which is a walking area or market place occasionally used by delivery or emergency vehicles.

### **COMPLEMENTS STREET FURNITURE**

Marshalls new "Simply Stone" range of cubes and benches are manufactured in the same stones as the Stonespar range so that street furniture can be co-ordinated with the paving to create a more harmonised landscape.

### **ETHICALLY SOURCED**

These are the first commercial products to carry the Fairstone Logo which is the mark put against particular premium stone products which give the Marshalls guarantee about its provenance. All these products are ethically accredited and audited to the very highest of standards. The Fairstone trademark provides a guarantee of fair pay, safe conditions for workers, no child labour and also affirms an active participation in the local communities providing health care and education programmes.

## THINK BEYOND 'THE NORMAL'

Stonespar provides a unique opportunity to deliver a real difference, offering an exciting range of new design and style opportunities for stone paving. With Stonespar, differing blends can be juxtaposed to achieve subtle, shaded patterns, going beyond the conventional to create a range of new possibilities. From simple stitch bonds to erratic herringbones, or using a change of bond to indicate trafficked areas, the potential for Stonespar is limited only by the designer's imagination.

# FERROCAST®: TOUGHER, SLEEKER, EASIER,

## FERROCAST. BETTER ALL ROUND.

Ferrocast polyurethane is the material for the modern environment, with all the benefits of cast iron – and none of the problems. An engineering grade polymer cast around a tough steel core, Ferrocast is both structurally strong and incredibly resistant.

The flexibility of the material means it can be cast into almost any shape and be supplied in any RAL colour. Low cost tooling makes bespoke designs affordable and customised detailing, such as crests and logos, can be added quickly and easily. So now you can create better designs, exactly how you want them.

## FERROCAST

- Doesn't rust
- High chip resistance
- Doesn't corrode
- Lighter than cast iron
- Quicker to install and cheaper to deliver
- Low maintenance
- UK manufactured

# SOCIAL SEATING. ATTRACTIVE, CONVIVIAL,

Demetra Seat with Wide Slats

Metrolinia Benches and Planters

Twist Three Place Seat, Table and Chair

Link Blanket

# DURABLE, MODULAR, FLEXIBLE

[Link](#)

## THE SOCIAL SEATING RANGE

In today's ever changing urban landscapes, the need to provide flexible seating arrangements is ever increasing. Gone are the days when a 1.8m bench or seat will satisfy the needs of every landscape. These items still have a place within the linear environment of a typical street; however, the contemporary urban realm demands much greater flexibility.

Modular seating can be used effectively to define a landscape and provide more diverse use over and above traditional linear seating.

The Marshalls Social Seating range comprises of novel, modular and linear attractive street furniture which meet the demands of any architectural surrounding and will suit most budgetary requirements, creating better landscapes.

The flexibility of modular seating makes it suitable for a wide range of environments because:

- Space can be defined in more interesting ways using collections of units, with limitless configurations and ability to tailor to client's own needs
- In large spaces, it can be used to define areas of use and demarcate boundaries. The limited size of units allows them to be easily moved if space is needed
- Modular units encourage less prescribed use, people can perch or sit and squeeze on in a more relaxed manner
- Not only do modular systems provide effective use of space, they can have more presence. Particularly in large spaces, they can act as focal points
- With a change in urban lifestyles, the demand for new products and spaces to contain them is growing. Seating which is more relaxed encourages conviviality and can improve social interaction.

## BELLITALIA PRECIOUS STONE DEMETRA AND ARTEMIDE LINEAR SEATING

Understanding outdoor spaces and bringing them to life, Bellitalia created these 6 stylish and durable street furniture items that offer comfort and amenity to all users.

Demetra bench is the ideal piece of furniture to improve the user experience in multiple landscape types. It is available either plain, with timber slats, with or without backrest or with a timber inset seat section. There are three types of timber to choose from: Iroko, Larch and Pine. Timber used comes from sustainable sources.

Artemide planter is monolithic and perfectly complements the Demetra social seating range. It features a water reservoir and allows overflowing water to be diffused via an opening at the front of the planter.

Both products are manufactured using precious stone, a combination of marble and portland cement. The aggregates do not absorb water and are frost-resistant, guaranteeing a product that will not alter over time and prevent mould formation.

Both Demetra and Artemide have a self levelling base, making it possible to compensate a ground slope up to 6%, making the product perfectly level.

**Price:** £1390 - £2890

Product Description	Seat Span (mm)	Width (mm)	Height (mm)	Weight (mm)	Guide Price

**METROLINIA.**

**Bench Section**

**Stand Alone Block**

## MONOSCAPE METROLINIA MODULAR SYSTEM

The Metrolinia Modular Seating System is novel and robust. There are 11 components within the Metrolinia range which can be used to create your seating configuration.

For linear runs, an end block is always required. Should you wish to create a circular seating arrangement, then end blocks are not required. Add some planting arrangements into your configuration using the planter module. The timber seat section offers extra comfort to all users.

Once you have a design in mind, we suggest that you contact our sales team. Where required, Marshalls Street Furniture Design Team can create a rendered example of your seating configuration.

Lengths vary from 600-1200mm, width from 600-1200mm and height is 456mm for all modules. Coordinates perfectly with Metrolinia Block Paving.

CODA . CONTEMPORARY, ELEGANT, COORDINATED

Standard Colour Options

Silver Grey Mid Grey Anthracite

## CODA

A cohesive range of street furniture, lighting and signage; designed by Alex Lifschutz and manufactured by Marshalls at Sandy and Woodhouse in Leamington Spa.

- Contemporary forms complement both the newest architectural trends and established environments.
- Signature contrast and slash design details create identity that unifies the whole range, including seating, cycle stand, bollard, litter bin, monolith and fingerpost signage and street lighting.
- Robust materials and quality manufacture ensure long life and long term value.
- FSC Iroko timber weathers naturally, is highly durable and virtually maintenance free.
- Marshalls' concrete complements premium, granite-effect ranges such as Metrolinia and Conservation.
- High levels of recyclability provide excellent end-of-life credentials.
- Independently tested LED luminaire delivers excellent lighting performance, efficiency and Standards compliance.
- Seventy two lighting options across colour temperature, running current and module configuration for ultimate flexibility with a singular design language.
- Highly configurable signage system that incorporates updateable directional slats, illuminated mapping and technology integration in a signature Coda frame

# EXHIBITION ROAD. THE ROYAL BOROUGH

The RIBA Award winning £28m redevelopment of Exhibition Road has transformed one of London's most visited streets into one of the most accessible cultural destinations in the world.

It is one of London's most high profile streets, being home to leading cultural and academic institutions, but over time had become inefficient, being dominated by traffic with narrow, crowded pavements and street clutter. A complete redesign was needed.

The Royal Borough of Kensington & Chelsea decided to run a design competition for the space, which was won by Architects Dixon Jones.

The winning design's vision was a complete overhaul of the street, creating 'shared space'. This means that pedestrians and vehicles co-exist without one being the dominant force and is created by the removal of kerbs, pavements and other obstructions; this encourages motorists to slow down creating a safer and more secure environment for all.

Marshall's was approached to supply a range of key physical features of the redevelopment; natural stone, bespoke street lighting, drainage solutions and street furniture.

**MAYOR OF LONDON,  
BORIS JOHNSON, SAID:**

*'This clever approach to rearranging the streetscape at the heart of one of the most important cultural and academic corners on the planet will heighten the whole experience for visitors.'*

*'In particular it will make it much easier and even more pleasurable for families visiting these unique attractions with space to wander unhindered in an area that puts people first.'*

# OF KENSINGTON & CHELSEA

## THE SOLUTION

Marshalls worked with Dixon Jones and contractors Balfour Beatty to supply the 22,000m<sup>2</sup> of Yorkstone paving and Granite setts banded in black and pink, which create the diagrid crisscross paving pattern giving the street its unique visual identity.

The Marshalls water management team worked with Balfour Beatty to design and supply the street's drainage solutions; two continuous linear drainage channels including bespoke cast iron tops.

Woodhouse worked closely with the client and landscape architect to design and supply a new multi-function street lighting concept to create, engineer and manufacture a distinctive yet functional lighting solution; 28 bespoke tapering 20m steel lighting masts which define the centre of the carriageway, and which also coordinate with the Woodhouse Geo street furniture range.

## THE BENEFIT

The finished result makes Exhibition Road one of the most striking thoroughfares in London. The paving's diamond shape pattern, as well as being visually appealing, naturally leads users across the street from one famous cultural centre to another.

The clutter free environment feels calm, and allows crowds to flow more freely over the paving allowing for easy passage from South Kensington tube station to the museums which line the famous road.

The bespoke Woodhouse lighting masts enhance the appearance of the streetscape's many colours, textures and finishes, and give pedestrians the feeling of added security.

# THE 2012 OLYMPIC & PARALYMPIC GAMES

**5 years** of work to construct a purpose built state-of-the-art **500 acre** site costing **£11 billion**.

Hosting **17,000 athletes** and officials from **204 nations** competing for **302 gold medals** in just **14 days**.

## THE LARGEST CONSTRUCTION PROJECT IN DECADES

- The regeneration of **2.5** square kilometres (246 hectares) - equivalent size to Hyde Park
- **8.35km** of waterways created in and around the Olympic Park
- One of the largest urban parks to be built in Europe for **150 years**
- **200** buildings demolished before work on the park could begin
- More than **600,000** tonnes of soil washed to remove any trace of contamination
- **100** hectares of new parklands created
- **10** rail lines built to serve the Olympic Park
- **5** new permanent venues constructed
- **30** new bridges constructed
- **12** residential blocks constructed within the Athletes Village
- By 2012 **30,000** people had worked on the construction project
- **30,000** tonnes of silt, gravel and rubble removed from waterways
- Planting of more than **4,000** trees, **74,000** plants, **60,000** bulbs and **300,000** wetland plants
- **4** skeletons were discovered and removed during construction
- Over **4 million** visitors to the park over the course of the Olympic and Paralympic Games

## MARSHALLS' INVOLVEMENT:

- **15** manufacturing/distribution points used
- Marshall's products feature in **11** of the newly constructed Athletes Village apartment blocks
- Over **400** hours of Marshall's design team time logged
- **2** members of the Marshall's team were permanently located on site at the Athletes Village
- **576** loads of Marshall's products delivered to the Athletes Village alone
- **100,000m<sup>2</sup>** of Machine Lay Piora Permeable Paving was installed in a **6** week window
- **1,400** tonnes of product supplied by rail
- Products supplied from **3** countries
- **53** separate contracts supplied nationwide
