

Marshall's

Premier Mortars and Screeds

COLOUR SWATCH BOOK

Marshalls Premier Mortars and Screeds is one of the largest suppliers of ready-to-use natural and coloured mortars, pre-mixed screeds and renders in the UK. Our plants currently serve most of the UK mainland.

Marshalls Premier Mortars and Screeds has been a wholly owned subsidiary of Marshalls PLC since 2004 and our success is based on providing excellent product quality and a high level of customer service. With a range of vehicle types and delivery methods at our disposal, we are confident that we can deliver your product where you need it - when you need it.

We also offer a same day collection facility: saving the customer valuable time and money.

Our entire ready-to-use mortars range is set retarded. This provides a workable life to suit a typical rate of construction. Once setting commences the mortar will perform identically to site-mixed and silo-mixed mortar.

Coloured mortars can help you realise significant aesthetic improvements to your project. Coloured mortars can be used in individual areas to create striking and elegant effects. We are able to offer our full range of mortars in a large variety of colours.

Premier Mortars ready to use mortars are manufactured to the requirements of BS EN 998 part 2 under a quality system certified to ISO 9001 and are regularly tested to the requirements of the latest British and European standards.

The colours shown in this book are as exact as photographic and printing processes will allow. While they are an excellent guide, we recommend that an actual mortar sample is seen, especially if large quantities are being ordered.
