**Marshalls**

*Creating Better Spaces*

## ABOUT MARSHALLS

Marshalls is the UK's leading hard landscaping company and has achieved this status through progressive product innovation and by demonstrating outstanding service levels to our customers. This privileged position will be sustained by continuous investment in our brand, our products, and our people.

Our vision is built on four pillars:

- **DEMONSTRATING LEADERSHIP.**

We believe in driving the industry forward. It's an ambition we've been acting on for 120 years, thanks to our size, capability, range of products and unmatched market knowledge.

- **DELIVERING EXCELLENCE.**

We have very high standards. Our products have to be innovative, our people have to be the best, our workmanship has to be perfect. Only then can we deliver the quality we're renowned for, at every stage of the process.

- **BUILDING TRUST.**

Everyone at Marshalls acts with integrity, treating customers and their projects with care and respect. It means people trust us with their home, their business, their town. And it's how we foster relationships for the long-term.

- **BEING SUSTAINABLE.**

We use the world to source our products, so we have a responsibility to look after it. It's something we have been committed to for over 120 years and has ensured our longevity. Whether it's creating stronger communities, preserving environments, or contributing to the UN Global Compact, our work is always sustainable.

Our environment impacts everything we do. The better our environment, the better we can be. At Marshalls our aim is to create opportunities for better spaces for all, in our homes, streets, schools, offices and retail spaces. The Marshalls product range is designed around inspiring others to imagine better and create exceptional landscapes for all to enjoy.

## LANDSCAPE FURNITURE

As part of the Marshalls family, our wide ranging Landscape Furniture range is already playing a role in helping to create better spaces. Manufactured in the UK with additional ranges sourced from Europe, all are produced to the highest standards and in an extensive range of materials including concrete, steel, stainless steel, natural stone, polyurethane, aluminium, cast iron, timber and even recycled plastics. Our objective is to provide you with products which fulfil all functional, aesthetic and budgetary requirements.

Our product designers take inspiration from customer feedback and future trends to commission new concepts and ranges to enhance the built environment. Our specialist technical advice and design service helps to direct creative concepts right through to final production.

### FSC® CERTIFICATION

Marshalls is proud to follow FSC chain of custody certification and recently introduced its new FSC certified timber based Landscape Furniture; it demonstrates we care about the environment and the people that live and work in it.

The Forest Stewardship Council® (FSC®), is a global, not-for-profit organisation dedicated to the promotion of responsible forest management worldwide. FSC defines standards based on agreed principles for responsible forest stewardship that are supported by environmental, social and economic stakeholders.

To learn more, visit [www.fsc.org](http://www.fsc.org)

- The Forest Stewardship Council® is an international non-governmental organisation that promotes environmentally appropriate, socially beneficial and economically viable management of the world's forests.
- FSC® is dedicated to the promotion of responsible forest management worldwide.
- FSC® helps take care of forests for future generations helping to protect the people and wildlife that call them home.
- FSC® certification allows customers purchasing products sold with FSC claims to be confident they are genuinely FSC certified.

The mark of responsible forestry

Look out for products labelled with an FSC logo, the mark of responsible forestry, within our seating brochure.

## BUILT ON INTERNATIONAL EXPERTISE

When you choose Marshalls, you don't just get a product - you get a century of global expertise in a huge range of projects, from the simple to the complex.

To ensure your plans are brought to life, we'll work hand-in-hand with you, providing practical know-how and technical support in appraisals and installation. Our dedicated international team has expertise working on projects spanning the globe and are able to assist in all areas of project management.

Discover more at [www.marshalls.co.uk/international](http://www.marshalls.co.uk/international)

## Our Global Reach

Established for over a century, Marshalls is the largest supplier of hard landscaping materials in the United Kingdom and has exported to overseas markets in more than fifty countries for over thirty years. No other manufacturer in the world can match Marshalls' product range or experience in supplying superior hard landscaping products to commercial buildings, homes, residential projects, roads and all manner of public & private spaces.

■ Countries containing a Marshall office

## Our products have been supplied around the world for over 30 years

Marshalls is recognised as a market leader and continues to supply overseas markets with its wide range of time-proven products and pioneering new designs. Whether your project requires beautifully designed street furniture, innovative concrete products, superior natural stone or water management solutions, you can be confident that Marshalls products will give you better, safer and more sustainable landscapes.

## Case Study - Ferrari World, Abu Dhabi

Project: Ferrari World, Yas Island  
Products: Bespoke Lightstacks and  
LED Illuminated stone bollards

### Background

Ferrari World Abu Dhabi, the world's first Ferrari theme park and largest attraction of its kind, opened its doors on October 28th 2010, three weeks ahead of the second Formula 1™ Abu Dhabi Grand Prix. The sleek, contemporary building boasts an iconic red roof that spans 200,000 m<sup>2</sup> and is directly inspired by the classic double-curve side profile of the Ferrari GT. The setting demanded a similarly iconic lighting solution that would flow cohesively from interior to exterior, echoing the design ethics of the building and resonating with the middle-eastern location.

### Approach

Marshalls was approached to provide a site-specific lighting solution suitable for both interior and exterior spaces and worthy of the quality demanded by the client. The development of a bespoke lightstack sympathetic to the Ferrari design and material philosophy yet appropriate to the distinctive location within the United Arab Emirates.

Marshalls worked closely with the project designers to develop an elegant cylindro-conical lightstack in painted mild steel, overlaid with an immaculate sheath of contrasting 316 brushed stainless steel. Working with scant concept sketches, the particular challenge of this product was the deployment of a 3 axis laser to cut the tapered cladding into the distinctive geometric pattern with a high level of accuracy and perfect symmetry.

### Outcome

A stunning aesthetic, combined with manufacturing excellence, have delivered a unique product that perfectly meets the technical demands of both the brief and the challenging environment. Marshalls has supplied 40 lightstacks to this prestigious scheme and continues to support the project as it develops.

## Case Study - Reston Police Station, USA

Project: Reston Police Station  
 Architect: Aecom  
 Contractor: Hitt Contracting  
 Marshalls Products Used: Bespoke GEO Benches

### Background

As part of a regeneration project for Reston Police station in Virginia, Marshalls was approached by Aecom to provide seating around the main entrance of the building. Part of the brief was to enhance existing perimeter protection whilst providing a high quality seating solution in keeping with the aesthetics of the building.

### Approach

The seating solution had to be complementary to the surroundings of the station environment whilst enhancing the existing physical perimeter protection around the space. The row of concrete bollards were to be shrouded by the legs of the GEO benches to effectively integrate the perimeter protection into the landscape without detracting from its aesthetics.

Marshalls' engineering team were able to customise the GEO bench, expanding the leg dimensions to ensure a secure fit around the outside of the concrete bollards.

### Outcome

An aesthetically driven, bespoke engineered solution not only provides a seating solution to the space but also improves its physical security.

The design of the bespoke GEO benches coordinate perfectly with the arch of the station roofline to form the cohesive environment.

## Case Study - Malta International Airport, Malta

Project: Malta International Airport, Malta  
 Client: Malta International Airport  
 Marshalls Products used: Igneo seats, RhinoGuard Planters, RhinoGuard Bollards, RhinoGuard Litter Bins, RhinoBlocs

### Background

Malta International Airport welcomes over five million passengers each year and links three continents with over 90 airports directly to Malta. These landscape enhancements were part of a €12 million upgrade programme including new screening procedures and observation platforms.

### Approach

Marshalls was approached by the head of security at Malta Airport to advise on suitable protective furniture in order to ensure that tourists arriving at this popular holiday destination would be safely protected but at the same time not feel that they were in a threatened environment. They fully embraced the concept of "Inner Strength – Outer Beauty" with a range of planters, litter bins and seating, all coordinated in Marshalls' silver grey granite aggregate finish.

### Outcome

Marshalls is proud to have contributed to the safety of this important and traditional tourist destination with the provision of RhinoGuard Stainless Steel Bollards and RhinoGuard Planters, Litter Bins and PAS 68 Igneo Seats and matching RhinoBlocs.

SEATING  
SHOULDN'T  
JUST BE...

...SOMEWHERE  
TO SIT.

## LET'S CREATE THE GREATER OUTDOORS

Our integrated Landscape Furniture ranges have everything you need to create spaces that people flock to. Places they can meet up, unwind and relax. Whatever you're looking for, whether it's a specific product or a certain theme, you'll find everything you need to create the greater outdoors.

Discover more at [www.marshalls.co.uk/landscapefurniture](http://www.marshalls.co.uk/landscapefurniture)

**NATURAL ELEMENTS**

The Natural Elements Collection, inspired by biophilic design, is a modular based Landscape Furniture range that aims to introduce natural materials into urban spaces where people can sit and wellbeing is improved.

# Personalised configurations are available with playful modules

## STEP 1

### Start with end panel

Select an end panel with or without arms.  
Option to illuminate panel.

#### A. END PANEL

L - 500 mm, H - 470 mm, W - 75 mm

#### B. END PANEL WITH ARMREST

L - 500 mm, H - 670 mm, W - 75 mm

## STEP 2

### Select your core modules

Modules can be configured in any sequence.  
Option to add low level lighting along the length of core modules.

Non lit end panels, planters, transition modules and bollards will have a galvanised and powder coated laser cut panel as standard.

## STEP 3

### Select an armrest

Choose armrest option between units if required.

#### C. ARMREST

L - 500 mm, H - 700 mm, W - 70 mm

## STEP 4

### Select transition modules to change direction

Choice of modules to go around corners at 45° or 60° angles. Further core components can be added as required. Repeat step 2 if creating longer configurations.

## STEP 5

### Finish with end panel

Please see step 1

## STEP 6

### Ancillary elements

Ancillary elements such as a litter bin, bollard or cycle stand are also available to maintain the design language.

Standalone seat and bench also available.

## UNLIMITED FLEXIBILITY

### With Natural Elements

Mix and match from the selection of playful components to create unlimited configurations.

## System components: Create your seating solution using the components below

**1. SEAT MODULE**  
L - 1640 mm, H - 899 mm, W - 500 mm

**2. CONCAVE BENCH MODULE**  
L - 1640 mm, H - 450 - 500 mm, W - 500mm

**3. 45° RADIUS CORNER**  
L - 881 mm, H - 500 mm, W - 500 mm

**4. CONVEX BENCH MODULE**  
L - 1640 mm, H - 500 - 550 mm, W - 500 mm

**5. PLANTER MODULE**  
L - 1200 mm, H - 500 mm, W - 500 mm

**6. 60° RADIUS CORNER**  
L - 570 mm, H - 500 mm, W - 468 mm

**7. CYCLE STAND**  
L - 70 mm, H - 700 mm, W - 500 mm

**8. BOLLARD**  
L - 140 mm, H - 1000 mm, W - 90 mm

**9. SEAT WITH ARMS**  
L - 1790 mm, H - 899 mm, W - 500 mm

**10. RECYCLE BIN**  
L - 600 mm, H - 1040 mm, W - 480 mm

**11. PLANTER**  
L - 1350 mm, H - 500 mm, W - 500 mm

**12. CONCAVE BENCH**  
L - 1790 mm, H - 450 - 500 mm, W - 500 mm

### Natural Elements Collection

The Natural Elements Collection, inspired by biophilic design, is a modular based Landscape Furniture range that aims to introduce natural materials into urban spaces where people can sit and wellbeing is improved.

The form and design style of the modular range resembles patterns found in the natural environment and the FSC® certified timber is responsibly sourced from well managed sources. The steel elements that help combine the modules are laser cut with signature cell-like pattern to create a striking effect.

The range elements are clad with FSC certified redwood timber, available in a choice of two water based woodstains. Steel feature panels are finished in a choice of two patented powder coating systems giving the appearance of an aged material.

The collection also incorporates decorative integrated lighting to enhance the aesthetics of a scheme.

This is either available as side LED light panels or low level lighting incorporated into the base of the modules.

### MATERIALS/COLOURS

## STRATIC

The Stratic Collection combines a modern and dynamic range of products that mimic the finishes, smooth lines and contours of the automotive industry. A combination of materials including Accoya timber, cast aluminium, stainless steel and steel provides an extremely durable and low maintenance solution, offered in a choice of contemporary colour options.

# STRATIC Collection

**1. SEAT**  
L - 2012 mm, H - 767 mm, W - 450 mm

**2. BENCH**  
L - 2012 mm, H - 637 mm, W - 450 mm

**3. PLANTER**  
L - 1200 mm, H - 800 mm, W - 600 mm

**4. CYCLE STAND**  
L - 324 mm, H - 637 mm, W - 140 mm

**5. LED MARKER**  
L - 200 mm, H - 950 mm, W - 200 mm

**6. LITTER BIN**  
L - 500 mm, H - 1100 mm, W - 450 mm

### Recommended Colour Combinations

Capacity 85 L

### Stratic Collection

The Stratic Collection combines a modern and dynamic range of products that mimic the finishes, smooth lines and contours of the automotive industry. A combination of materials including Accoya timber, cast aluminium, stainless steel and steel, provides an extremely durable and low maintenance solution, offered in a choice of contemporary colour options.

Timber is finished with a water based woodstain. The Seating elements and Cycle Stand are manufactured from sleek cast aluminium, the LED Marker from stainless steel with the Planter and Litter bin from steel.

### MATERIALS/COLOURS

## GEO

GEO is a fully coordinated lighting, signage and Landscape Furniture system, designed to help reduce street clutter and to create a visual link between public spaces. GEO reflects the best of modern urban design and has been selected for some of the most prestigious and iconic public realm regenerations. The design philosophy behind the GEO system is unfussy and simply designed to reduce visual confusion and physical clutter. GEO recognises that it is the people and the street that is important, not the amount of elements there to "control" them.

## GEO Collection

**GEO Collection**

GEO features co-ordinated and cohesive lighting, signage and Landscape Furniture designed to complement, rather than collide with, contemporary architectural styles.

The highest quality materials are used in GEO construction and are chosen with the knowledge that installation is disproportionately costly in relation to the furniture. This material choice decreases routine maintenance and replacement and therefore minimises the total lifetime cost.

The Litter Bin, Bollards and Lightstack are also available with integrated Rhinoguard™ Pas 68 crash tested technology.

## LOCI

The Loci Collection offers a powerful visual impact alongside ergonomic comfort. Created with a distinctly professional interior style, it is ideal for all sectors due to its linear design composed of clean square forms.

# LOCI Collection

## CUSTOMISE LOCI TO YOUR SCHEME

Integral to the blueprint of Loci is the ability to introduce distinctive colour to create exceptional elements of Landscape Furniture. Available in all RAL shades, (including Effect colours and the metallic range), there are endless combinations to define Loci exactly as you wish.

Colour is applied to Loci through a powder coated system that is Volatile Organic Compound and solvent free. The paint finish provides robust and durable protection without the need for environmentally damaging galvanising processes, thus actively reducing your project's environmental impact. The powder coating paint application process ensures minimal waste, with excess powder collected and reused, resulting in low wastage and therefore economical benefits.

### BASE COLOUR

Choose from Graphite Grey or Telegrey 2 for the main body of the unit.

### TIMBER

The light coloured ethically sourced Emerti timber provides a signature Scandinavian feel to the furniture

### ACCENT COLOUR

Any of the legs can be customised with an accent colour to give Loci its vibrant personality.

Step 1: Select your items

Step 2: Select your base colour

Step 3: Select your accent colour

### ACCENT COLOURS

### BASE COLOURS

### ACCENT COLOUR / INSERT

The Loci cycle stand is fitted with timber inserts as standard to protect cycle frames from damage. To customise the cycle stand, the timber can also be exchanged for a powder coated steel insert.

### BASE COLOUR

Choose from Graphite Grey or Telegrey 2 for the main body of the unit.

## Loci Collection

The flexible design of Loci has a distinctive lightness and transparency. With a clear linear profile based around square forms, the individual elements work well in groups due to their lightness of presence. Loci responds to the architecture of its time and its uniquely asymmetric design resonates through the full suite of products. The eye-catching 'ribbon' element offers enormous potential for creativity and flexibility

## METROLINIA

The Metrolinia Modular Seating system allows designers to meet many of the challenges of contemporary urban landscapes. The system is comprised of a range of 'building blocks' to enable limitless configurations of seats and benches, as well as the incorporation of planters into the design. Space can be defined in more interesting ways with collections of units, with limitless tailored configurations achievable. In large spaces, it can be used to define areas of use and demarcate boundaries. The limited size of units allows them to be easily moved if space is needed.

## Unlimited Combinations With Metrolinia...

Integrate planting into a linear configuration

Create a unique cross configuration with integrated planting

A curved configuration can be created using corner units

Create a social seating hub with a combination of seats, benches and planters

# System components: Create your seating solution using the components below

## STEP 1 - Select End Module

End blocks are used to start or finish a configuration and can be specified with either a radius corner or a square end.

**1. RADIUS END BLOCK**  
L - 600 mm, H - 456 mm, W - 600 mm

**2. SQUARE END BLOCK**  
L - 600 mm, H - 456 mm, W - 600 mm

**3. SEAT**  
L - 1200 mm, H - 456 mm, W - 612 mm

**4. BENCH**  
L - 1200 mm, H - 456 mm, W - 612 mm

## STEP 2 - Select Intermediates

Intermediate modules bring your design to life with the combination of seating and planting.

To be used in the middle of a configuration only  
Not to be used at an immediate right angle with another seat

To be used in the middle of a configuration only  
Not to be used at an immediate right angle with another seat

**5. PLANTER**  
L - 600 mm, H - 456 mm, W - 600 mm

**6. RADIUS CORNER BLOCK**  
L - 1200 mm, H - 456 mm, W - 1200 mm

**7. INTERMEDIATE BLOCK (600)**  
L - 600 mm, H - 456 mm, W - 612 mm

**INTERMEDIATE BLOCK (1200)**  
L - 1200 mm, H - 456 mm, W - 612 mm

Not to be used as a stand alone module

**8. CORNER BLOCK**  
L - 600 mm, H - 456 mm, W - 600 mm

**9. X BLOCK**  
L - 600 mm, H - 456 mm, W - 600 mm

**10. T BLOCK**  
L - 600 mm, H - 456 mm, W - 600 mm

## STEP 3 - Select Transition Modules

Transition modules are used to give added flexibility to your configuration to overcome the challenges of different landscapes

## Metrolinia Collection

The modular Metrolinia range allows flexibility to meet many of the challenges of contemporary urban landscapes. The system comprises of a range of 'building blocks' to enable unlimited configurations of seats, benches and planting.

Following the simple configuration rules, blocks are secured to a surface mounted rail ensuring the solution can be scaled to fit the project. Radius end pieces can also be integrated into the configuration to navigate corners and more intricate spaces.

### MATERIALS/COLOURS

# WATERSIDE

The Waterside Collection is based around a unique elliptical form, resulting in a stylish and functional selection of Landscape Furniture suitable for both modern and traditional landscapes.

Manufactured from Ferrocast®, The Waterside Collection is extremely durable, won't rust or corrode, and can be supplied in any standard RAL colour as shown, helping you create a better landscape with a better material.

# Waterside Collection

**1. SEAT**

Capacity 130 L

The Waterside Post and Rail system is available as a 3, 5 or 6 rail unit to suit the aesthetic requirements of a project.

## Ferrocast

The extremely durable Ferrocast® material enables the range to be perfectly suited for challenging environments such as seafronts. Due to the unique polyurethane chemical composition, the material will not rust or corrode.

## Waterside Collection

The Waterside collection, manufactured from Ferrocast® is defined by sleek elliptical forms that allow the range to sympathetically blend into the landscape.

The extremely durable Ferrocast® material enables the range to be perfectly suited for challenging environments such as seafronts. Due to the unique polyurethane chemical composition, the material will not rust or corrode.

A steel core gives the products internal strength for optimum durability.

## CODA

Coda is a cohesive collection of Landscape Furniture, lighting and signage elements that has derived from our extensive experience of public realm innovation and regeneration. Building upon the successful legacy of our bestselling GEO collection, we have collaborated with leading designer Alex Lifschutz, and his team at LDS once more, to conceive a modern urban design classic.

Customise with the Coda Colour Slash

## Coda Collection

The Coda collection, manufactured from wet cast concrete is available in three colour tones which coordinate with Marshalls Metrolinia and Conservation paving.

The signature Coda "slash" colour contrast can aid DDA compliance and mask low level street dirt and rain splatter.

The aluminium monolith can also be customised with the signature colour slash with a coordinated powder matching the concrete colours.

All metal items are finished with a highly durable Polyester powder coat in RAL 9007.

## MARSHALLS M3

Manufactured from 316L grade stainless steel the stylish and versatile Marshalls M3 coordinated collection has a reputation for style, quality and value in the market.

The sleek stainless steel design style runs throughout the range offering a contemporary solution for almost any landscape.

Each slat is wrapped around the top and lower supporting tubes and welded at three points of contact. This ensures rigidity and strength in the structure, making the seat less prone to vandalism.

## IGNEO

Igneo is a coordinated concrete modular system that offers contemporary styling, combined with functionality and maximum robustness. The collection consists of a seat, chair, stool and a litter bin. The seating can be specified to any length, based on the module sizes, dependent on the location and the number of seating places required.

Manufactured in Ferrocast®, seating arm rests and litter bin doors will have a long life span and require virtually no maintenance. Ferrocast parts can be ordered in any standard RAL colour.

# Igneo Collection

# THE FUTURE STARTS HERE

Curated by  Marshalls

## FUTURE SPACES

Marshalls believes in creating better spaces – and as the UK's leading landscape materials brand, we believe that it's important to think ahead.

Future Spaces is our ambitious attempt to foresee how the commercial, public and domestic spaces we help design, build and share might adapt and evolve over the next ten years.

We set out to predict how changing lifestyles, technology and economic conditions might dictate the look, feel, colour, shape, textures and materials used to create those spaces.

But once we dug below the surface we found much more.

Four unstoppable global mega-trends driving 12 emerging themes: pervasive forces that will change the nature of our built environment, both subtly and dramatically.

Future Spaces is the result of our own intensive research, including interviews with academics, industry commentators, journalists, architects, landscape designers, materials technologists, engineers, futurologists – as broad a spectrum of opinions, ideas and experience as we could find.

Here, we're delighted to share a brief glimpse of what we might expect as the future rushes towards us at an ever-increasing pace.

If you are intrigued by this short introduction to our Future Spaces project, and you're keen to find out more, visit [marshalls.co.uk/futurespaces](http://marshalls.co.uk/futurespaces).

### 01 THE BLURRING OF PUBLIC/PRIVATE SPACES

A subtle shift in the ownership and management of urban spaces will change forever where we can go – and what we can do – 'in public'.

### 02 MORE PEOPLE IN SMALLER SPACES

As we strive to accommodate more urban residents, workers and commuters, the spaces they occupy will have to adapt, becoming smaller, going higher – or both.

### 03 DEMARCATING MULTI-USE SPACES

As living space becomes a scarce and crowded commodity, it will have to work harder. Both indoors and outdoors, the spaces we share will be designed to serve multiple functions for different types of user.

### 04 THE NEW WAVE OF WATER MANAGEMENT

Climate change means that water will have a significant impact on the built environment, our daily lives and the economy. If we are to avoid a deluge, innovative thinking and bold changes in behaviour will be needed. Sooner rather than later.

### 05 FUTURE CONCRETE

As the world becomes increasingly urban, city designers will look to concrete to solve a plethora of complex problems. Compelled to evolve to meet the challenges facing the built environment, concrete is set to become the material of the future.

### 06 THE BLOSSOMING OF BIOPHILIC DESIGN

As the world becomes more urbanised, nature will be pushed to the fringes. Biophilic design – the mimicking of natural forms – will satisfy our deep craving for a connection to nature, and help improve people's quality of life.

### 07 URBAN GREENING

'Green infrastructure' will become vital to the health of towns and cities – and their inhabitants. From managing air quality and rainfall run-off to providing vital space for people to step away from their daily stresses, planners will see a green strategy as integral to their development process.

### 08 THE RISE OF THE SUPER-LANDLORD

The advent of 'generation rent' will see institutional investors buying into the private rental sector. The emergence of homes as an asset class will affect the way architects, designers and landscape professionals approach the design and specification of volume rental stock.

### 09 THE GENDER NEUTRALISATION OF SOCIETY

As the genders become more balanced in society, the way the built environment is created and used will shift. As society redresses a history of male dominance, women will take more influential roles – both as practitioners and as consumers.

### 10 PLACEMAKING FOR THE PEOPLE

Placemaking is a collaborative approach to creating more sociable neighbourhoods – from the bottom up. Involving people in the planning of their own community will put local needs and aspirations at the heart of the built environment, and engender a sense of ownership and belonging.

### 11 BUILDING - IN RESILIENCE

As global urbanisation accelerates, cities need to be able to continue to function properly under increasing, multiple stresses. To do that, cities must be consciously designed to resist the impacts of natural, social, political and economic events.

### 12 THE CIRCULAR ECONOMY

As an ambitious alternative to a traditional, linear 'make, use, dispose' model, the circular economy's aim is to eradicate needless waste and build-in re-use wherever possible. There is exciting potential for the creative industries and the construction sector to make this work on a city scale.
