

Stonespar Sander Red

Date Created: 10/05/18

The Stonespar Sander Red Sandstone is a plank paving range, suitable for both residential and commercial schemes. Its non-slip properties and durability means that it is the perfect choice for pedestrian zones.

Available in striking sander red, the Stonespar planks allow designers to create uniformity in design across an urban project.

The hard-wearing nature of Stonespar sandstone means that it can also deal with occasional heavier loads in trafficked areas, such as those where there are infrequent deliveries and emergency vehicle loading.

Within the Stonespar range, other colours are available, including pre-blended mixes such as Vasanta, Grishma, Sharad, Hemant, Dava and Nisha.

DESCRIPTION

Quarry of Origin	Kota Region, Rajasthan, India
Base Raw Material	Sandstone
Governing Manufacturing Standards	All data where relevant to be established in accordance with BS EN 1341 : 2012, BS EN 1342 : 2012 & BS EN 1343 : 2012
CE Marking/DOP	https://www.marshall's.co.uk/dop
