

Stonespar Brownridge

Date Created: 10/05/18

Stonespar Brownridge is a one-size blended sandstone paving that offers the strength and durability for which sandstone is traditionally renowned.

A subtle brown coloured stone, it is an excellent choice for pedestrian areas due to its non-slip properties, but it's also capable of carrying the occasional delivery and emergency vehicle loading.

Supplied with a top surface which has a blasted and brushed finish to enhance slip resistance and colour, it comes pre-blended in the crates to speed up installation and reduce space on site. Marshall's Stonespar range offers six pre-blended mixes inspired by the four seasons. There is also the opportunity to create your own unique blend. Contact our expert team for further details.

PHYSICAL PROPERTIES

Tolerances on Work Dimensions (mm)	Paving Class 1, Setts Class 2, Kerbs Class 2 tolerances to all dimensions as standard Others by agreement
------------------------------------	--

MANUFACTURING

Materials Control	CE Marked to BS EN 1343 Kerbs
-------------------	-------------------------------

DESCRIPTION

Quarry of Origin	Kota Region, Rajasthan, India
Base Raw Material	Sandstone
Governing Manufacturing Standards	All data where relevant to be established in accordance with BS EN 1341 : 2012, BS EN 1342 : 2012 & BS EN 1343 : 2012
CE Marking/DOP	https://www.marshall's.co.uk/dop
