Date Created: 07/02/19

Marshalls' Household Inspection Chambers provide a flexible solution to the requirements of any drainage access project. Manufactured as pre-formed concrete modular components, size, depth and fit can be adjusted.

Each individual component is available in 4 sizes and 2 depths, and features tongue and groove detailing, which allows for a more accurate build and helps with on-site placement. Specially designed to fit drainage fixtures and fittings, Marshalls' Household Inspection Chambers can be deployed quickly and easily, with no additional work required.

Made from high quality pre-cast concrete, Household Inspection Chambers offer durability throughout construction and long-term sulphate resistance, compliant to BS EN 1917:2002 once in situ.

Household Inspection Chambers come with a full range of concrete covers, frames and reducer slabs, providing you with best fit, a clean look and a cost-effective solution to drainage inspection requirements.
