Beany Block

Date Created: 02/08/18

Beany - Standard Grey

Beany Conservation - Silver Grey

Marshalls' Beany Block is a reliable and effective medium to high capacity drainage solution that's been used by professionals for over 30 years. Beany Block has an established reputation for solving drainage problems where other systems fail, or project restrictions make other solutions impractical.

With over 1 million linear metres installed, Marshalls' Beany Block has a proven pedigree across a range of applications. Its durability and lack of remedial work offer peace of mind and lower ongoing costs.

Manufactured as a two-piece concrete system and available in either standard or textured finishes. Beany Block has excellent slip skid properties. It can be used alongside a range of accessories to provide a solution that's both flexible and aesthetically pleasing.

Marshalls' Beany Block combines the largest hydraulic capacity with a loading classification up to E600. Robust concrete construction enables it to withstand installation damage and its simplicity makes it a highly cost-effective and versatile road drainage solution.

DESCRIPTION		
Manufacturing Process	Hydraulically pressed concrete	
Governing Manufacturing Standards	All data where relevant to be established in accordance with BS EN 1433 : 2002	
CE Marking/DOP	https://www.marshalls.co.uk/dop	
NBS Specification	Q10 190	Q25 800

PHYSICAL PROPERTIES	
Work Dimensions (mm)	430mm width x 500mm length x 205mm depth 430mm width x 500mm length x 295mm depth 430mm width x 500mm length x 365mm depth 490mm width x 500mm length x 630mm depth
Apparent Density	2300 kg/m³ (typically
Loading Classification	E600
Water Absorption (%)	Meets the requirement for Grade 2
Water Tightness	Meets the requirements of the standard.
SPECIFICATION	
Approx unit weight (kg)	70 to 110 (excluding top units)
Emission of Asbestos	No content
Reaction to fire	Class A1, see commission decision 2000/605/FC
	2000/003/EC
APPLICATION	2000/003/LC
APPLICATION Application	Suitable for use in any kerb location as defined in BS EN 1433 and The Highways Agency's Contract Documents and Specification for Highway Works
	Suitable for use in any kerb location as defined in BS EN 1433 and The Highways Agency's Contract Documents and
Application Suitability	Suitable for use in any kerb location as defined in BS EN 1433 and The Highways Agency's Contract Documents and Specification for Highway Works Suitable for use in any kerb location as defined in BS EN 1433 and The Highways Agency's Contract Documents and
Application Suitability PERFORMANCE	Suitable for use in any kerb location as defined in BS EN 1433 and The Highways Agency's Contract Documents and Specification for Highway Works Suitable for use in any kerb location as defined in BS EN 1433 and The Highways Agency's Contract Documents and Specification for Highway Works
Application Suitability	Suitable for use in any kerb location as defined in BS EN 1433 and The Highways Agency's Contract Documents and Specification for Highway Works Suitable for use in any kerb location as defined in BS EN 1433 and The Highways Agency's Contract Documents and
