ABOUT MARSHALLS

Marshalls is the UK's leading hard landscaping company and has consolidated its status as the market leader through progressive product development and exceptional customer service. We are experienced in delivering hard landscaping projects for homes, gardens and urban environments of all sizes. Marshalls products are regularly specified by architects, landscape designers, town planners and developers for a wide range of projects. Our comprehensive product range, industry leading service levels and ability to deliver inspirational hard landscape solutions to meet our customers’ needs is reflected in our sustained growth and market position.

Our vision is built on four pillars:

• DEMONSTRATING LEADERSHIP. We believe in driving the industry forward. It’s an ambition we’ve been acting on for 120 years, thanks to our size, capability, range of products and unmatched market knowledge.

• DELIVERING EXCELLENCE. We have very high standards. Our products have to be innovative, our people have to be the best, our workmanship has to be perfect. Only then can we deliver the quality we’re renowned for, at every stage of the process.

• BUILDING TRUST. Everyone at Marshalls acts with integrity, treating customers and their projects with care and respect. It means people trust us with their home, their business, their town. And it’s how we foster relationships for the long-term.

• BEING SUSTAINABLE. We use the world to source our products, so we have a responsibility to look after it. It’s something we have been committed to for over 120 years and has ensured our longevity. Whether it’s creating stronger communities, preserving environments, or contributing to the UN Global Compact, our work is always sustainable.

Our environment impacts everything we do. The better our environment, the better we can be. At Marshalls we are committed to reducing our carbon footprint, improving our environmental performance and creating sustainable solutions for healthy environments. Our environmental impact is the fine balance between what we put into it and what we take out of it. We are committed to a sustainable future and are focused on managing natural systems in a way that maintains and enhances the environment.

LANDSCAPE FURNITURE

As part of the Marshalls family, our wide ranging Landscape Furniture range is already playing a role in helping to create better spaces. The products in our full range are designed and manufactured in the UK. The range can be specified either from stock or made to order from Europe, all of which comply with the highest standards and are an extension of our own hard landscaping ranges. Junior stainless steel, natural stone, polypropylene, slate, terrazzo, concrete, timber and more. Our product designers take inspiration from customer feedback and future trends to create innovative new concepts and ranges to enhance our extensive range. Our specialist technical and design teams help clients deliver consistent quality through design.

FSC® CERTIFICATION

Marshalls are proud to follow FSC® chain of custody certification and recently introduced its new FSC® certified timber based Landscape Furniture; it demonstrates we care about the environment and the people that live and work in it.

The Forest Stewardship Council® (FSC®) is a global, not-for-profit organisation that promotes environmentally appropriate, socially beneficial and economically viable management of the world’s forests. FSC® helps take care of forests for future generations helping to protect the people and wildlife that call them home. FSC® certification allows customers purchasing products sold with FSC® claims to be confident they are genuinely FSC® certified. Look out for products labelled with an FSC® logo, the mark of responsible forestry, within our seating brochure.

A CITY IS NOT AN ACCIDENT…

BUILT ON INTERNATIONAL EXPERTISE
When you choose Marshalls, you don’t just get a product – you get a century of global expertise in a huge range of projects, from the simple to the complex.

To ensure your plans are brought to life, we’ll work hand-in-hand with you, providing practical know-how and technical support in appraisals and installation. Our dedicated international team has expertise working on projects spanning the globe and are able to assist in all areas of project management.

Discover more at www.marshalls.co.uk/international
Established for over a century, Marshalls is the largest supplier of hard landscaping materials in the United Kingdom and has exported its products to more than fifty countries for over thirty years. No other manufacturer in the world can match Marshalls' product range or experience in supplying superior hard landscaping products to commercial buildings, homes, residential projects, roads and all manner of public & private spaces.

Our products have been supplied around the world for over 30 years. Marshalls is recognised as a market leader and continues to supply overseas markets with its wide range of time-proven products and pioneering new designs. Whether your project requires beautifully designed street furniture, innovative concrete products, superior natural stone or water management solutions, you can be confident that Marshalls products will give you better, safer and more sustainable landscapes.

Our Global Reach
Case Study - Ferrari World, Abu Dhabi

Background

Ferrari World Abu Dhabi, the world’s first Ferrari theme park and indoor attraction, opened its doors on October 28th, 2010, three weeks ahead of the second Formula 1™ Abu Dhabi Grand Prix. The sleek, contemporary building boasts an iconic red roof that spans 200,000 m² and is directly inspired by the classic double-curve side profile of the Ferrari GT. The setting demanded a similarly iconic lighting solution that would flow cohesively from interior to exterior, echoing the design ethics of the building and resonating with the middle-eastern location.

Approach

Marshalls was approached to provide a site-specific lighting solution suitable for both indoor and outdoor spaces and worthy of the quality demanded by the client. The development of a bespoke lightstack sympathetic to the Ferrari design and material philosophy yet appropriate to the distinctive location within the United Arab Emirates.

Marshalls worked closely with the project designers to develop an elegant cylindro-conical lightstack in painted mild steel, overlaid with an immaculate sheath of contrasting 316 brushed stainless steel. Working with scant concept sketches, the particular challenge of this product was the deployment of a 3-axis laser to cut the tapered cladding into the distinctive geometric pattern with a high level of accuracy and perfect symmetry.

Outcome

A stunning aesthetic, combined with manufacturing excellence, has delivered a unique product that perfectly meets the technical demands of both the brief and the challenging environment. Marshalls has supplied 40 lightstacks to this prestigious scheme and continues to support the project as it develops.
Background
As part of a regeneration project for Reston Police station in Virginia, Marshalls was approached by Aecom to provide seating around the main entrance of the building. Part of the brief was to enhance existing perimeter protection whilst providing a high quality seating solution in keeping with the aesthetics of the building.

Approach
The seating solution had to be complementary to the surroundings of the station environment whilst enhancing the existing physical perimeter protection. The row of concrete bollards were to be shrouded by the legs of the GEO benches to effectively integrate the perimeter protection into the landscape without detracting from its aesthetics.

Marshalls’ engineering team were able to customise the GEO bench, expanding the leg dimensions to ensure a secure fit around the outside of the concrete bollards.

Outcome
An aesthetically driven, bespoke engineered solution not only provides a seating solution to the space but also improves its physical security. The design of the bespoke GEO benches coordinate perfectly with the arch of the station roofline to form the cohesive environment.

Case Study - Reston Police Station, USA

Project: Reston Police Station
Architect: Aecom
Contractor: Hitt Contracting
Marshalls Products Used: Bespoke GEO Benches

Case Study - Malta International Airport, Malta

Project: Malta International Airport, Malta
Client: Malta International Airport
Marshalls Products used: Igneo seats, RhinoGuard Planters, RhinoGuard Bollards, RhinoGuard Litter Bins, RhinoBloks

Background
Malta International Airport welcomes over 5 million passengers each year and links three continents with over 90 airports directly to Malta. These landscape enhancements were part of a €12 million upgrade programme including new screening procedures and observation platforms.

Approach
Marshalls was approached by the head of security at Malta Airports to advise on suitable protective furniture in order to ensure that tourists arriving at this popular holiday destination would be safely protected but at the same time not feel that they were in a threatened environment. They fully embraced the concept of “Inner Strength – Outer Beauty” with a range of planters, litter bins and seating, all coordinated in Marshalls’ silver grey granite aggregate finish.

Outcome
Marshalls is proud to have contributed to the safety of this important and traditional tourist destination with the provision of RhinoGuard Stainless Steel Bollards and RhinoGuard Planters, Litter Bins and PAS 68 Igneo Seats and matching RhinoBloks.
SEATING SHOULDN'T JUST BE...

...SOMEBWHERE TO SIT.

LET'S CREATE THE GREATER OUTDOORS

Our integrated Landscape Furniture ranges have everything you need to create spaces that people flock to. Places they can meet up, unwind and relax. Whatever you’re looking for, whether it’s a specific product or a certain theme, you’ll find everything you need to create the greater outdoors.

Discover more at www.marshalls.co.uk/landscapefurniture
The Natural Elements Collection, inspired by biophilic design, is a modular based Landscape Furniture range that aims to introduce natural materials into urban spaces where people can sit and wellbeing is improved.
Personalised configurations are available with playful modules.

**STEP 1**
Start with end panel
Select an end panel with or without arms, digital to illuminate panel.

**STEP 2**
Select your core modules
Modules can be configured in any sequence, option to add low-level lighting along the length of core modules.

**STEP 3**
Select an armrest
Choose armrest option between or as required.

**STEP 4**
Select transition modules to change direction
Choice of modules to go around corners at 45° or 60° angles. Further core components can be added as required. Repeat step 2 to form larger configurations.

**STEP 5**
Finish with end panel
Please see step 1.

**STEP 6**
Ancillary elements
Ancillary elements such as a litter bin, bollard or cycle stand are also available to maintain the design language. Standalone seat and bench also available.

UNLIMITED FLEXIBILITY
With Natural Elements
Mix and match from the selection of playful components to create unlimited configurations.

A. END PANEL
L - 500 mm, H - 470 mm, W - 75 mm

B. END PANEL WITH ARMREST
L - 500 mm, H - 670 mm, W - 75 mm

C. ARMREST
L - 500 mm, H - 700 mm, W - 70 mm

Non-lit end panels, planters, bollards, models and bollards will have a galvanised and powder coated laser cut panel as standard.
System components: Create your seating solution using the components below

1. SEAT MODULE

10. RECYCLE BIN
    L - 600 mm, H - 1040 mm, W - 480 mm

11. PLANTER
    L - 1350 mm, H - 500 mm, W - 500 mm

12. CONCAVE BENCH
    L - 1790 mm, H - 450 - 500 mm, W - 500 mm

The Natural Elements Collection, inspired by biophilic design, is a modular, functional range that aims to introduce natural materials into urban spaces where people can sit and wellbeing is improved.

The form and design of the modular range resembles patterns found in the natural environment and the FSC® certified timber is responsibly sourced from well-managed forests. The steel elements that help combine the modules are laser cut with a signature cell-like pattern to create a striking effect.

The range elements are clad with FSC certified redwood timber, available in a choice of two water-based woodstains. Steel feature panels are finished in a choice of two patented powder coating systems giving the appearance of an aged material.

The collection also incorporates decorative integrated lighting to enhance the aesthetics of a scheme. This is either available as side LED light panels or low level lighting incorporated into the base of the modules.
STRATIC

The Stratic Collection combines a modern and dynamic range of products that mimic the finishes, smooth lines and contours of the automotive industry. A combination of materials including Accoya timber, cast aluminium, stainless steel and steel provides an extremely durable and low maintenance solution, offered in a choice of contemporary colour options.
The Stratic Collection combines a modern and dynamic range of products that mimic the finishes, smooth lines and contours of the automotive industry. A combination of materials including Accoya timber, cast aluminium, stainless steel and steel, provides an extremely durable and low maintenance solution, offered in a choice of contemporary colour options.

Timber is finished with a water based woodstain. The Seating elements and Cycle Stand are manufactured from sleek cast aluminium, the LED Marker from stainless steel with the Planter and Litter bin from steel.

- Timber Stain: Onyx
- Powder Coat: Carbon
- Powder Coat: Copper

Stratic Collection

The Stratic Collection continues a modern and dynamic range of products that mirror the finishes, smooth lines and contours of the automotive industry. Accoya timber, cast aluminium, stainless steel and steel, provide an extremely durable and low maintenance solution, offered in a choice of contemporary colour options.

Timber is finished with a water based woodstain. The Seating elements and Cycle Stand are manufactured from sleek cast aluminium, the LED Marker from stainless steel with the Planter and Litter bin from steel.
GEO

GEO is a fully coordinated lighting, signage and landscape furniture system, designed to help reduce street clutter and to create a visual link between public spaces. GEO reflects the best of modern urban design and has been selected for some of the most prestigious and iconic public realm regenerations. The design philosophy behind the GEO system is unfussy and simply designed to reduce visual confusion and physical clutter. GEO recognises that it is the people and the street that is important, not the amount of elements there to "control" them.
GEO Collection

GEO seating reflects the best of modern urban design: simplicity, sustainable and robust materials in a low profile form. The GEO seating range is contemporary, yet its simple discreet unobtrusive lines make it equally suited to both historical and modern settings.

Seating elements are manufactured from a combination of high quality Stainless Steel, Steel and Iroko Timber.

**GEO Collection**

**1. SEAT**
- L - 1800 mm, H - 790 mm, W - 525 mm

Capacity 70 L
LOCI

The Loci Collection offers a powerful visual impact alongside ergonomic comfort. Created with a distinctly professional interior style, it is ideal for all sectors due to its linear design composed of clean square forms.
CUSTOMISE LOCI TO YOUR SCHEME

Integral to the blueprint of Loci is the ability to introduce distinctive colour to create exceptional elements of landscape furniture. Available in all RAL shades, (including Effect colours and the metallic range), there are endless combinations to define Loci exactly as you wish.

- Colour is applied to Loci through a powder coated system that is volatile organic compound and solvent free. The paint finish provides robust and durable protection without the need for environmentally damaging galvanising processes, thus actively reducing your project’s environmental impact. The powder coating process ensures minimal waste, with excess powder collected and reused, resulting in low wastage and therefore economical benefits.

BASE COLOUR

Choose from Graphite Grey or Telegrey 2 for the main body of the unit.

TIMBER

The light-coloured ethically sourced Emeri timber provides a signature Scandinavian feel to the furniture.

ACCENT COLOUR

Any of the legs can be customised with an accent colour to give Loci its vibrant personality.

ACCENT COLOUR / INSERT

The Loci cycle stand is fitted with timber inserts as standard to protect cycle frames from damage. To customise the cycle stand, the timber can also be exchanged for a powder coated steel insert.

Step 1: Select your items

**MATERIALS**
The flexible design of Loci has a distinctive lightness and transparency. With a clean linear profile based around square forms, the individual elements work well in groups due to their lightness of presence. Loci responds to the architecture of its time and its uniquely asymmetric design resonates through the full suite of products. The eye-catching ‘ribbon’ element offers enormous potential for creativity and flexibility.

METROLINIA

The Metrolinia Modular Seating system allows designers to meet many of the challenges of contemporary urban landscapes. The system is comprised of a range of ‘building blocks’ to enable limitless configurations of seats and benches, as well as the incorporation of planters into the design. Space can be defined in more interesting ways with collections of units, with limitless tailored configurations achievable. In large spaces, it can be used to define areas of use and demarcate boundaries. The limited size of units allows them to be easily moved if space is needed.
Unlimited Combinations With Metrolinia…

- Integrate planting into a linear configuration
- Create a unique cross configuration with integrated planting
- A curved configuration can be created using corner units
- Create a social seating hub with a combination of seats, benches and planters
System components: Create your seating solution using the components below

STEP 1 - Select End Module
End blocks are used to start or finish a configuration and can be specified with either a radius corner or a square end.

1. RADIUS END BLOCK
   - L - 600 mm, H - 456 mm, W - 600 mm
2. SQUARE END BLOCK
   - L - 600 mm, H - 456 mm, W - 600 mm
3. SEAT
   - L - 1200 mm, H - 456 mm, W - 612 mm
4. BENCH
   - L - 1200 mm, H - 456 mm, W - 612 mm
5. PLANTER
   - L - 600 mm, H - 456 mm, W - 600 mm

STEP 2 - Select Intermediates
Intermediate blocks bring your design to life with the combination of seating, planting and radiusing corners.

6. RADIUS CORNER BLOCK
   - L - 1200 mm, H - 456 mm, W - 1200 mm
7. INTERMEDIATE BLOCK (600)
   - L - 600 mm, H - 456 mm, W - 612 mm
8. INTERMEDIATE BLOCK (1200)
   - L - 1200 mm, H - 456 mm, W - 612 mm
9. X BLOCK
   - L - 600 mm, H - 456 mm, W - 600 mm
10. T BLOCK
    - L - 600 mm, H - 456 mm, W - 600 mm

STEP 3 - Select Transition Modules
Transition modules are used to give added flexibility to your configuration to overcome the challenges of different landscapes.

11. CORNER BLOCK
    - L - 600 mm, H - 456 mm, W - 600 mm

The modular Metrolinia range allows flexibility to meet many of the challenges of contemporary public landscapes. The system comprises of a range of ‘building blocks’ to enable unlimited configurations of seats, benches and planting.

Following the simple configuration rules, blocks are secured to a surface mounted rail ensuring the solution can be scaled to fit the project. Radius end pieces can also be integrated into the configuration to navigate corners and more intricate spaces.

CODA

Coda is a cohesive collection of Landscape Furniture, lighting and signage elements that has derived from our extensive experience of public realm innovation and regeneration. Building upon the successful legacy of our bestselling GEO collection, we have collaborated with leading designer Alex Lifschutz, and his team at LDS once more, to conceive a modern urban design classic.

CODA Collection

www.marshalls.co.uk/international
The Coda collection, manufactured from wet cast concrete, is available in three colour tones which coordinate with Marshalls Metrolinia and Conservation paving. The signature Coda “slash” colour contrast can aid DDA compliance and mask low level street dirt and rain splatter.

The aluminium monolith can also be customised with the signature colour slash with a coordinated powder matching the concrete colours.

All metal items are finished with a highly durable Polyester powder coat in RAL 9007.

OPTIONAL ARM REST

FESTIVAL COLLECTION

Manufactured from 316L grade stainless steel for stylish and durable M3 coordinated range has a reputation for style, quality and value in the market. The system is less prone to pitting and staining than those in lower grades, providing at the same time optimal strength. Each slat is wrapped around the top and lower supporting tubes and welded at three points of contact. This ensures rigidity and strength in the structure, making the seat less prone to vandalism.

The Festival Collection is also available as a powder coated, mild steel alternative to Marshalls M3. Festival carries the same design language as Marshalls M3 but at a more cost effective price point. To see all Festival seating options, see page 133.

IGNEO

Igneo is a coordinated concrete modular system that offers contemporary styling, combined with functionality and maximum robustness. The collection consists of a seat, chair, stool and a litter bin. The seating can be specified to any length, based on the module sizes, dependent on the location and the number of seating places required.

Manufactured in Ferrocast®, seating arm rests and litter bin doors will have a long life span and require virtually no maintenance. Ferrocast parts can be ordered in any standard RAL colour.

LET’S CREATE THE GREATER OUTDOORS
Marshalls believes in creating better spaces – and for the UK’s leading landscape materials brand, we believe that it’s important to think ahead.

Future Spaces is our seminal attempt to forecast how the commercial, public and domestic spaces we help design, build and share might adapt and evolve over the next ten years.

We set out to predict how changing lifestyles, technology and economic conditions might dictate the look, feel, colour, shape, textures and materials used to create those spaces. But as we dug below the surface we found much more.

Four unstoppable global megatrends driving 12 emerging themes: pervasive forces that will change the nature of our built environment, both subtly and dramatically.

Future Spaces is the result of our own intensive research, including interviews with academics, industry commentators, journalists, architects, landscape designers, materials technologists, engineers, planners – and a broad spectrum of opinion, ideas and experience.

Here, we’re delighted to share a brief glimpse of what we might expect as the future rushes towards us at an ever-increasing pace.

If you are intrigued by this short introduction to our Future Spaces project, and you’re keen to find out more, visit marshalls.co.uk/futurespaces.
