Thistlestone Pitched Walling 450 x 100 x 140mm

Thistlestone Reconstructed Stone Walling is suitable for commercial and housing projects for both load and non-load bearing walls. As with Marshalls' other reconstructed walling products, Thistlestone provides a high-quality natural stone face appearance at an affordable price, favoured by developers and house builders.

Thistlestone comes in three finishes – Pitched, Split or Rustic. Pitched Face Walling has a rough effect, with each block displaying a distinctive raised centre. Split Face Walling is perfect for applications where a flatter, less prominent texture than a pitched face is required. Rustic Walling gives finished walling a rounded, softer and less defined finish.

Thistlestone Walling is only available in Scotland.

Hydraulically pressed concrete

Date Created: 12/03/19

Thistlestone Pitched Walling 450 x 100 x 140mm

PHYSICAL PROPERTIES	
Work Dimensions (mm)	450 x 100 x 140
Nominal Dimensions (mm)	450 x 100 x 140
Tolerances on Work Dimensions (mm)	Length +3 -5mm, width +3 -5mm, height +3 -5mm
Durability (Freeze-thaw)	Frost resistant
Material Density	2300 kg/m³ (typically)
Thermal Conductivity (K value)	1.27 W/mK @ P=50%1.42 W/mK @ P=90%
Compressive Strength (MPa)	Mean compressive strength of not less than 20 N/mm² with a characteristic compressive strength of 17.5 N/mm²
Water Absorption (%)	≤ 3g/m²s
Water Vapour Permeability	30/100 µ
Shear Bond Strength	0.15 N/mm131
Dimensional Stability	0.89 mm/m
SPECIFICATION	
Selection Of Mortar	It is recommended that the guidelines provided in BS EN 1996 - Design of Masonry Structures be taken into account before a final choice is made
	provided in BS EN 1996 - Design of Masonry Structures be taken into
Selection Of Mortar	provided in BS EN 1996 - Design of Masonry Structures be taken into account before a final choice is made
Selection Of Mortar Emission of Asbestos	provided in BS EN 1996 - Design of Masonry Structures be taken into account before a final choice is made No content Class A1, see commission decision
Selection Of Mortar Emission of Asbestos Reaction to fire	provided in BS EN 1996 - Design of Masonry Structures be taken into account before a final choice is made No content Class A1, see commission decision 2000/605/EC
Selection Of Mortar Emission of Asbestos Reaction to fire Dangerous Substances	provided in BS EN 1996 - Design of Masonry Structures be taken into account before a final choice is made No content Class A1, see commission decision 2000/605/EC No performance declared Spacing and width should be based on the guidelines provided in BS EN 1996 -
Selection Of Mortar Emission of Asbestos Reaction to fire Dangerous Substances Movement Joints	provided in BS EN 1996 - Design of Masonry Structures be taken into account before a final choice is made No content Class A1, see commission decision 2000/605/EC No performance declared Spacing and width should be based on the guidelines provided in BS EN 1996 -
Emission of Asbestos Reaction to fire Dangerous Substances Movement Joints SUSTAINABILITY Carbon Footprint	provided in BS EN 1996 - Design of Masonry Structures be taken into account before a final choice is made No content Class A1, see commission decision 2000/605/EC No performance declared Spacing and width should be based on the guidelines provided in BS EN 1996 - Design of Masonry Structures

masonry structures

Packaging	All packs are shrinkwrapped onto pallets for fork off-load or crane off-load if necessary
FURTHER INFORMATION	I
Cleaning & Maintenance	Cleaning & maintenance details are available on request
Efflorescence	Any product containing cement during its early life may exhibit a temporary white discolouration known as efflorescence. This is not a product fault and will gradually disappear with exposure to natural weathering and trafficking
Weathering	It should be appreciated that with all products weathering and site conditions can cause shade variation to appear across the surface of individual units. This does not in any way affect the performance of the units and any such variation will diminish over a period of time as the product matures.
Product Evolution	The evolution of new product design is continuous and information is subject to change without notice. Customers should check with the supplier to ensure that they have the latest details Marshalls reserve the right to amend the technical information as deemed necessary and in accordance with the relevant national and international standards without notice
Contact Us	For technical information on the design, specification and construction when utilising the product, contact the Technical Advisory Services Department on 0370 411 2233
