This specialist containment kerb system has been designed not only to provide clear visual delineation between trafficked and non-trafficked areas – its unusual design also redirects errant traffic to its intended path. This passive traffic control system provides an essential tool for designers and engineers who need to protect vulnerable street installations such as pedestrian refuges.
For a Radius greater than 12m straights should be utilised.

Also available in 600mm lengths.

For use with 125x255 Half Battered Kerb.

Coloured edging is perfect to create an attractive finishing landscaping touch. Keyedge can be used alongside a range of other Marshall’s products including the most popular Keyblok paving and the ‘New’ Keypave flag which is an ideal landscape solution for a wide variety of housing schemes.

• Standard smooth surface finish
• Chamfered profile
• Four colour options to complement and contrast with other Marshalls products
• Product size: (H)150x(L)800x(W)50mm

Bus Stop Kerb with reference numbers indicated in bold are available ex-stock.
Bus Stop Kerb with reference numbers indicated in light black are manufactured to order. Contact our sales office to discuss your requirements.

*Natural products are manufactured from aggregates sourced locally to the works and contain no pigmentation; therefore colour variation between products from different works is possible.

---

**Bus Stop Kerb**

**Variable Height Concrete Bus Stop Kerb System**

This two piece system has been designed to provide pedestrians with safe and easy access to buses and similar transportation of varying heights. The smooth, angle faced kerb can be installed at a variety of heights to coincide with the lowest steps of local buses, while the optional rumble channel allows bus drivers to position the vehicle as close to the kerb as possible.
Kerb Channels & Edgings

A highly durable precision-manufactured selection of channel and edging units used for a wide variety of landscaping purposes. These hydraulically pressed products are available in many different shapes and profiles to fulfil a wide range of design requirements.

Channels & Edging with reference numbers indicated in bold stock are available ex-stock.

*Natural products are manufactured from aggregates sourced locally to the works and contain no pigmentation, therefore colour variation between products from different works is possible.

**mostly used along footpath edges, ***mostly used as an aid to drainage, †used as a spacer between the kerb and the carriageway or used as off road parking and lay-bys.
Kerb Conservation 145 x 255

Offered in a wider/square contemporary profile. An aesthetically superior kerb system featuring a lightly textured surface and exposed granite aggregate to create a sophisticated, contemporary look. The 145x255 size, based on traditional pre-metric dimensions provides a wider, more squared off profile than the British Standard, creating a striking aesthetic in schemes where design-led flair is of paramount importance.

Conservation 145 x 255mm for Laying Upright Concrete Kerb

Conservation Kerb, Silver Grey, Ocean Estate

Offered in a wider/square contemporary profile. A simple way to marry prestigious, traditional looks with modern, precision manufactured convenience. This lightly textured kerb system, featuring exposed aggregate, is supplied in sizes which mirror traditional granite kerbstones.
The Yorkstone aggregate in these kerb units is exposed via a gentle texturing process, creating a warm, rustic feel, ideal for use in traditional landscapes. The 145x255 sizes are based on pre-metric sizes, further reinforcing the traditional aesthetic.
