BENEFITS OF ARTIFICIAL GRASS OVER TURF

- ✓ *Looks perfect all year round*
- ✓ *Ideal for pets and kids*
- ✓ *No more mowing*
- ✓ *No more mud*

NATURAL GRASS

Vs

ARTIFICIAL GRASS

AVOID DISAPPOINTMENT SPECIFY THE GRASS STANDARD

Our Grass Standard covers all the areas you need to look at when considering your artificial grass purchase and to help you avoid cheap foreign imports. The "Grass Standard" sets the benchmark for quality, performance, comfort and value in artificial grass.

See our Grass Standard in action...

MARSHALLS GRASS

Marshalls grass includes 100% latex backing which is more flexible, making it easier to work with and longer lasting.

COMPETITOR GRASS

Not all inferior products contain 100% latex backing resulting in a more complex install and the grass will start to crack and break up causing failure.

Always Green products are made in Britain by the world's leading supplier of artificial grass yarn so we can guarantee the provenance of our artificial grass.

Always Green has a realistic look of genuine grass due to its unique yarn mix and stitch rate giving it real body, vital for the realistic look of grass.

Always Green is made from 100% polyethylene which creates a soft feel yet sturdy structure to maximise 'bouncebackability' ideal for kids and pet play. Cheaper artificial grasses tend to add less expensive polypropylene into their blend, leaving a coarse, plastic feel.

Always Green is always tested to rigorous durability standards. The technology used to create our yarn has been certified to meet the strict criteria of professional sporting organisations such as FIFA, the IRB and FIH - ensuring extreme durability.

Always Green is guaranteed against UV damage for 10 years, exceeding EU standards and staying soft and looking good for longer. Lower quality artificial grass becomes brittle and misshapen after long exposure to the sun.

Always Green includes a high quality backing cloth to ensure that once laid the artificial grass stitches remain supple and strong and can withstand rigorous domestic use.

Always Green uses premium quality latex coated backing to eliminate movement and slippage yet strong enough to handle sustained activity. Inferior products will often resort to using fillers to add weight, compromising their product durability.

Summer Lawn

Village Green

Design & Install by Landscapes 4 Living.

VILLAGE GREEN

30mm pile

26mm pile

For a vibrant, evergreen finish

Always Green Village Green provides you with the same terrific attributes of Summer Lawn with the exception of a green thatch layer. The green thatch layer adds a more vibrant evergreen appearance to your artificial lawn. As with all Always Green products this turf is extremely durable featuring a premier backing cloth where each grass blade is secured, to deliver not only extreme resistance to pull force, but is also perforated so liquids can easily pass through. The new standard in artificial grass.

Playing Field

Design & Install by Waterdale Landscapes, York

PLAYING FIELD

22mm pile

The perfect surface for play

Always Green Playing Field has been developed specifically with the rough and tumble of child's play in mind. The monofilament turf fibres have exceptional split resistance compared to conventional turf fibres. Built to FIFA standards the yarn is not only durable but slide friendly and simply great to play on. The kids will have hours of fun on it and it will last for many years.

Always Green Artificial Grass	Pile Height mm	Width m	Length m	Pile and Thatch
Playing Fields	22	4	25	100% Polyethylene

Always Green is supplied in 4m widths and can be cut to any length up to 25m*.

*Minimum of 8sqm and cut the nearest 1sqm length after that.
