

DRIVEWAY PAVING

Sawn Granite Setts
Light

THE BEST PRODUCTS DESERVE THE BEST INSTALLATION...

Selecting the right paving products to create the desired effect should not be the only consideration when planning your driveway project. What lies beneath your driveway is as important, if not more important than the final layer.

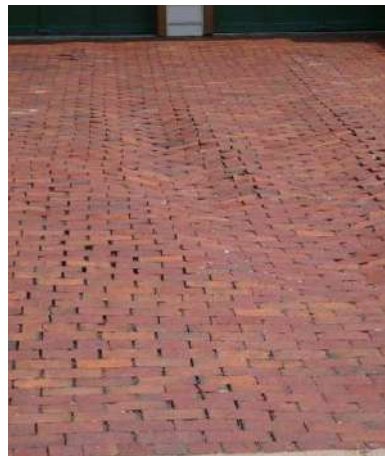

Where the sub-base is installed incorrectly or is insufficient to support the chosen driveway products, this is what happens to your investment...

Insufficient edge restraint

Poor sub-base

Poor sub-base

Our blocks come in different depths for different uses as follows:

Light usage: 50mm blocks for driveways, patios and pathways - suited to normal family cars.

Medium usage: 60mm blocks for adopted highways, hardstanding areas and other roads - suited for occasional delivery lorries.

CHOOSE A MARSHALLS REGISTER INSTALLER

Marshalls Register installers are assessed on a regular basis to ensure they install our products correctly, giving you your dream patio which will enhance your property into the future. That's why **99% of people who use a Marshalls Registered installer would recommend them to a friend.***

To find your local installer please visit www.marshalls.co.uk/findaninstaller

*Data analysis from Customer Feedback Forms, includes the period up to and including September 2017.

PERMEABLE DRIVEWAY LEGISLATION...

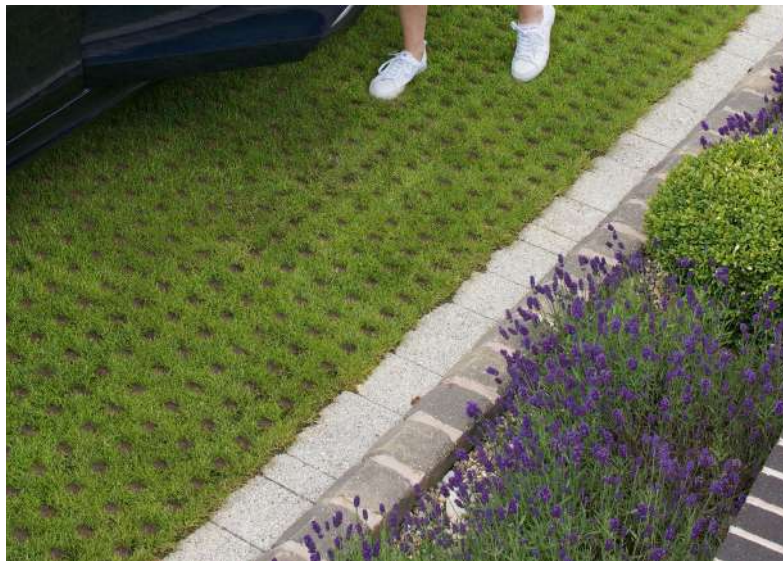

WHY YOU NEED DRAINAGE

The increased risk of flooding has led to changes in government legislation, meaning that the environmental consequences of creating hard landscaped areas for vehicle parking must now be taken into consideration when planning your driveway project. Visit www.communities.gov.uk for further information.

New and replacement driveways of any size are exempt from planning permission requirements when they use Sustainable Drainage Systems (SuDS).

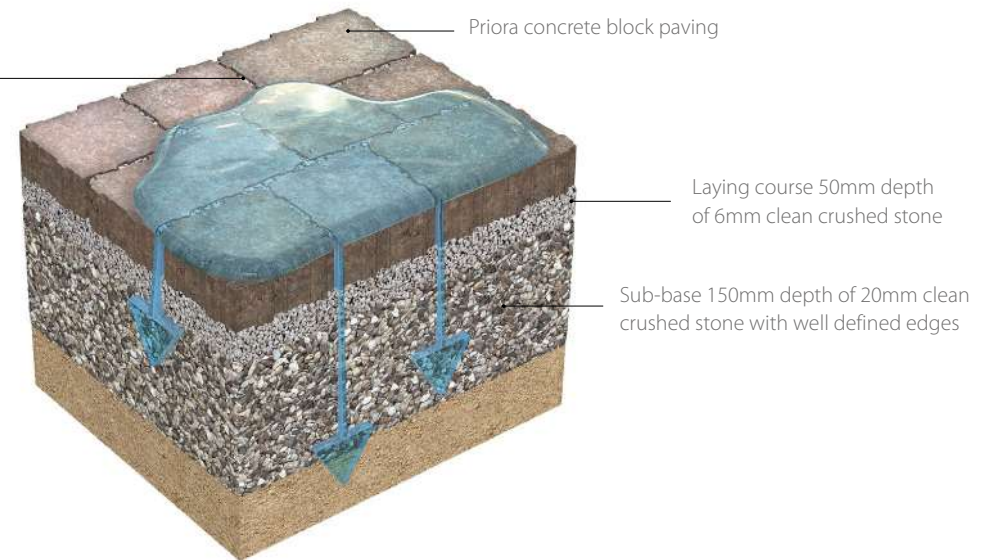

Marshalls offers a full range of driveway products requiring no planning permission and having a positive impact on the environment.

The Piora Sustainable Drainage System (SuDS) has been specifically designed to manage heavy rainfall events. Each 60mm block features the Marshalls patented Piora nib design, which allows surface water to pass between the blocks into a specially calculated sub-base without compromising the structural performance of the driveway.

Marshalls permeable grids such as Grassguard can also be used to create occasional parking areas capable of managing the rainfall that lands on your property as long as a permeable sub-base is installed.

Permeable joint
filled with 6mm
clean crushed
stone

*Please note Marshalls Grassguard products work differently by holding a smaller volume of water, whilst allowing continued use. Contact Marshalls Technical and Advisory Service for more information.

Where a permeable driveway is not an option, adequate drainage must be incorporated into your driveway or patio design in order to avoid having to obtain planning permission.

SHOP BY COLOUR - DRIVEWAYS

Most people have in mind a colour palette for their project, irrespective of material or texture. Here you can choose your driveway products using this useful colour chart grouped by colour tone and texture.

PORCELAIN DRIVEWAYS

SYMPHONY® PLUS Driveway
Charcoal

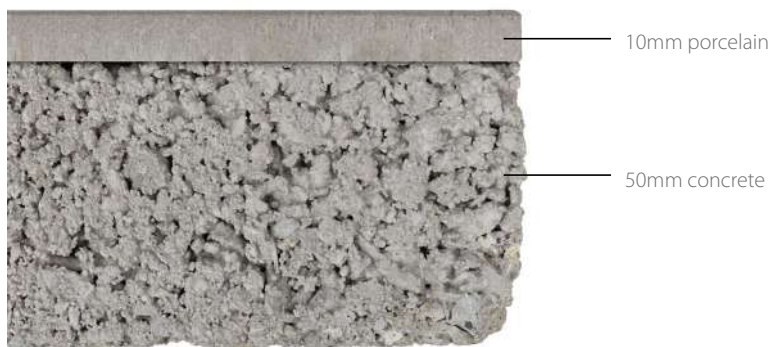

PORCELAIN FOR DRIVEWAYS...

Introducing an exciting new look for driveways, with all the advantages of standard porcelain paving.

Recognised for its popular clean cuts and contemporary finish, it is also extremely low maintenance.

Why choose **SYMPHONY® PLUS DRIVE...**

- Seriously easy and quick to install.
- Laid on a flexible bed.
- Backed with 50mm concrete for strength.
- Joint with Kiln Dried Sand.

Quotes from our
Registered Installer members:

"40% saving on labour costs"

"Really quick & easy to install"

**"Goes down in half the time as
normal porcelain"**

**"Not using cement makes my
installs much faster"**

SYMPHONY® PLUS Driveway
Charcoal

SYMPHONY® PLUS DRIVE **NEW**

Grey

Charcoal

All the aesthetic benefits of porcelain, now for your driveway

All the same fantastic advantages as standard porcelain paving, NOW FOR YOUR DRIVE.

With the fantastic benefits of a speedy installation, contemporary aesthetic finish and strong concrete backing, SYMPHONY® Plus Drive is perfect for any driveway project.

As SYMPHONY® Plus Drive is laid on a flexible bed, it allows a much quicker install than alternatives that require a mortar bed and our recommended jointing with Kiln Dried Sand all means this product can be installed quickly.

A woman with blonde curly hair, wearing a light blue shirt, black leggings, and blue gloves, is kneeling on a paved driveway. She is working with a small potted plant and a green watering can. The driveway is paved with interlocking concrete pavers in shades of brown, tan, and grey, arranged in a herringbone pattern. A curved border of lighter-colored pavers separates the driveway from a garden bed. In the background, a dark blue Range Rover is parked on the driveway. The garden bed contains various plants, including red and blue flowers, and a brick wall is visible on the left.

A budget driveway solution

Budget block paving which offers a slightly more attractive, practical and longer lasting option than a resin or asphalt product. However, if you're looking for an alternative product of superior quality, take a look at Driveline 50, made with our exclusive 'Surface Performance Technology'.

A woman in a grey jacket and blue jeans is walking a small black and white dog on a leash across a wide, curved driveway made of grey interlocking permeable pavers. The driveway is bordered on the left by a green lawn and a wooden fence. In the background, there is a two-story brick house with a dark grey tiled roof, a red balcony, and several windows with white frames. A white car is partially visible on the right side of the driveway.

A modern aesthetic with permeable properties

The ultimate sustainable driveway option with no additional drainage required and no need for planning permission. Drivesett Argent Priora Permeable Paving is designed to enable rainwater to percolate directly into the ground below, without overloading the drains, thereby reducing flood risk. Drivesett Argent Priora has all the design appeal of a contemporary granite-look and is available with a range of coordinating, walling and edging features.

A versatile permeable solution with an aged and authentic look

Drivesett Tegula Priora has been designed to manage heavy rainfall in a sustainable way, with surface water passing through into the ground below. As a result, there is no need for planning permission or any additional drainage. Drivesett Tegula is renowned for its lasting high quality look, whilst featuring an elegant time-worn appearance.

A patented permeable driveway solution

The affordable permeable driveway solution, available in a range of attractive and popular colour options to enhance every home. Driveline Piora manages driveway drainage by allowing surface water to pass through the joints directly into the ground below, therefore not overloading the drains and reducing flood risk. Due to this, no planning permission or additional drainage is required.
