

Active Travel & Social Distancing

Marshalls Active Travel Solutions

The Government's Active Travel Fund has presented an opportunity to create a lasting change to how people move around towns and cities. Installing infrastructure that supports safe cycling and walking will not only have a positive impact on health and wellbeing, it will also reduce emissions and be a transformative step towards a more sustainable future.

Marshalls has been manufacturing hard landscaping materials for over 130 years, we are the UK's leading supplier of products that are designed to create better spaces. This brochure highlights ranges that will help transform towns and cities into the places we need them to become – from tactile paving to Landscape Protection, kerbs to cycle storage.

For more information on our Active Travel solutions please contact us:

- Commercial Landscaping: **0345 30 20 700**
- Natural Stone: **0370 41 12 266**
- Landscape Protection: **0345 600 2425**
- Drainage: **0345 30 20 400**

To simplify your planning and procurement processes, many of the products work together to provide a single solution and we have a mix of temporary and permanent ranges to give you the flexibility you need right now.

We recognise that some of these changes are needed immediately, and more permanent schemes are in design, so it's worth knowing that 94% of our commercial products are manufactured in the UK meaning most products are available from stocks or with a short lead time.

Need assistance with your design? Contact our design team at design.team@marshalls.co.uk

"We can deliver to you **quickly** and **safely**."

Cycle Shelters & Storage

Cycle shelter designs providing bikes with effective protection and accessible storage offering secure location points to store bikes whilst ensuring cycling is a viable option for more people.

Bus Stop Kerb

Separating cyclists from buses at bus stops in city centres, train stations and neighborhoods

Litter Bins

Styles and materials to coordinate with our range of Active Travel products, keeping the area clean and improving the social environment.

Marshall's Active Travel Product Examples

Typical environments with examples of products from Marshall's that will enhance the journey experience and encourage social distancing

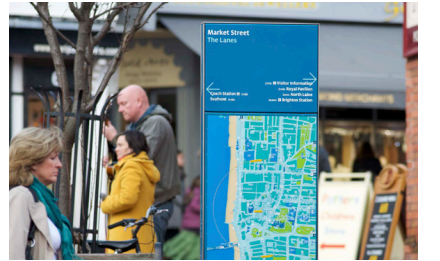

Bespoke Paving

Matching existing paving colourways, adding value to help you create a safe and personalised cycling scheme featuring unique designs, colours and finishes

Protective Solutions

Successfully crash tested, aesthetically designed Landscape Protection to protect all users and infrastructure, achieving peace of mind in proportion with all levels of risk, vulnerability and project budget

Signage

Updateable directional slats, illuminated mapping and technology integration in a single frame to match your project and the architectural surroundings

Combined Kerb & Drainage Kerb systems combined with cost effective and robust linear drainage to keep your city clean, whilst containing the carriageway and creating a barrier between vehicles and pedestrians

Paving Our paving portfolio offers complete design creativity to enhance a space and make it feel safer

Traffic Islands Achieving carriageway width reduction or flow deflection of vehicular traffic, keeping cyclists and pedestrians safe particularly in complex junctions

Cycle Segregation Providing a protective barrier between cyclists and vehicles, ensuring safety for experienced and beginner cyclists alike

Wayfinding Clear directional information with fingerposts and sign boards; bespoke solutions available to match your project

Coordinated Street Furniture Offering coordinated, contemporary designs for great value, enhancing the sense of place and connecting people
