RhinoGuard®
Steel GateKeeper®

LEADING THE WAY IN TEMPORARY, PROTECTIVE SOLUTIONS
ENGINEERED TO DELIVER MAXIMUM STOPPING POWER

The RhinoGuard® Steel Gatekeeper™ is the ideal temporary solution for protecting crowds of people gathering at events such as sporting fixtures or Christmas markets, against the threat of terrorist or vehicle attacks or accidental collisions. Crash tested to JWA 14.1 standards, Gatekeeper™ provides protection against vehicles weighing up to 2.5 tonnes, travelling up to 30 mph.

Surface-mounted, with no requirement for anchorage, the system doesn’t rely on kerbing or structural aids, giving users complete flexibility on where the units are positioned and because of the lightweight design, can be lifted and installed by a team of four.

Due to its modular design, the individual upright elements can also be removed at any point within the length to allow immediate access for emergency services vehicles.

GateKeeper®

Features & Benefits

- Quick deployment without relying on kerbs or structural aids
- Surface mounted and temporary meaning limited disruption during installation
- 5 module array
- Completely modular so suitable for any space
- 11 module array
- Anti-slip finish

SECURITY RATING
- Can withstand vehicles weighing up to 2.5 tonnes, travelling up to 10mph
- Successfully crash tested to WA 14.1 standards: WA 14.1 v25000N1G48/905.2 (11 unit crash test)
- WA 14.1 v25000N1G48/902/11 7 (3 unit crash test)
- Requires no anchorage
- Allows access for emergency services vehicles anywhere within the array

Fully galvanised mild steel providing long term protection from corrosion

Pedestrian permeable

Shields have the option of branded customisation or powder coating
