

DRIVESYS® DRIVEWAY PAVING

Marshall's
Creating Better Spaces

Drivesys® has been uniquely designed to create
a driveway that looks and feels like natural stone

The benefits of Drivesys®

- **Realistic natural stone look and feel** without the price tag
- **Patented bumper feature** allows flexible installation, reducing time and effort
- **Choice of surface textures and colours** to suit the style of your property
- **Easier to maintain** than the natural stone equivalent
- **20 year product and 5 year installation guarantee***

Drivesys® features

- Co-ordinating edging available
- Jointing compound supplied with every Drivesys® order
- Choice of 4 replica finishes:

Original
Cobble

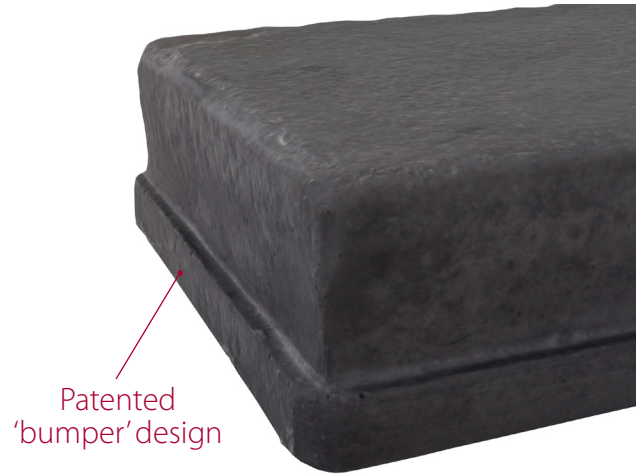

Split
Stone

Riven
Stone

Flamed
Stone

Patented
'bumper' design

Cutting down installation time and effort

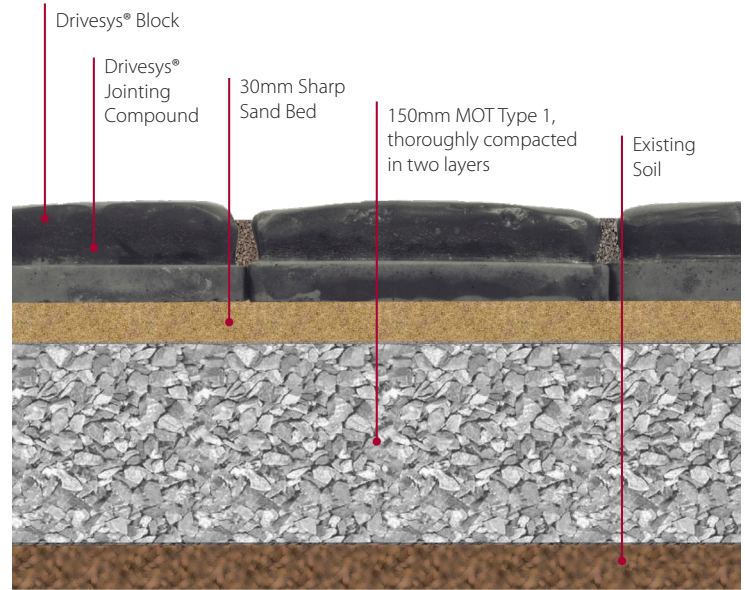

Every product in this range features the patented 'bumper' around the base of the blocks. Exclusive to the Drivesys® range, this is specifically designed to create a flexible and straightforward installation.

*when requested by a register member. guarantee covers jointing for 2 years.

The benefits of Drivesys® installation

Using the patented Drivesys® blocks along with the recommended Drivesys® ready mixed jointing solution, installation should be straightforward:

- Blocks are less likely to mark/scratch on the surface during install because of block-to-block contact
- Blocks are easier to lay, allowing well-installed spacing
- Jointing should sit flush between blocks and create an even surface with an impressive finish
- The finished driveway installation is more durable, due to block-to-block connected construction
- Creates natural stone look without the timely need to sort the product before laying

Drivesys® installation guidelines

Please ensure you follow the Drivesys® specific installation guidelines.

The illustration opposite shows recommended materials and build-up. Marshalls recommends the patented Drivesys® Driveway system is installed by a Marshalls Register Installer.

Note: Drivesys® blocks come with a protective transportation seal which will remain slightly slippery underfoot until weathered. Once the seal wears off, blocks may appear slightly lighter in colour.

Driveline Drain, Charcoal

Create a unique project

Mix and match Drivesys® products

Each Drivesys® product has been created with the same
patented bumper base.

All blocks have a depth of 60mm, which makes it easy to mix
and match the products to create a unique look for your
driveway project. Blend different colours of the same block
or add contrasting colours or aesthetics such as feature borders
or entrance slips.

The best products deserve the best installation...

Selecting the right paving products to create the desired effect should not be the only consideration when planning your driveway project. What lies beneath your driveway is as important, if not more important, than the final layer.

When the sub-base is installed incorrectly or is insufficient to support the chosen driveway products, this is what happens to the driveway investment...

Insufficient edge restraint

Poor sub-base

Poor sub-base

Choose a Marshall's register installer

Marshall's Register members are assessed on a regular basis to ensure they install our products correctly, giving you your dream patio or driveway which will enhance your property into the future. That's why **99% of people who use a Register member would recommend them to a friend.***
