EN1916:2002
DoP Ref: PD01

Reinforced/unreinforced precast concrete pipe for the conveyance of sewerage, rainwater and surface water, in pipelines that are generally buried.

Watertightness: No leakage of joint or pipe at 50 kPa (0.5 bar) internally.

Crushing strength: Circular bore pipes - strength class 120.
Ovoid bore pipes - strength class 150.

Longitudinal bending strength: DN300 Dimensionally adequate

Durability: Adequate for normal serviceability conditions.

Durability of joints: Demonstrated according to Method 1 or 2.
