Created to aid visually impaired and blind people as they navigate towns and cities on foot, Marshalls' Blister Tactile Flag Paving makes it easier to identify where drop kerbs and appropriate road-crossing places are located.

The raised blister paving can be felt underfoot, while those with less severe sight loss can also use the product's colour coding to access extra information about their surroundings.

Red Blister Tactile Slabs & Flag Paving is laid at controlled crossing points, while the same product in buff is found at uncontrolled crossing points. Alternatively, natural and charcoal units are permitted in some types of conservation areas.

DESCRIPTION	
Appearance	Solid unit with profiled surface
Manufacturing Process	Hydraulically pressed concrete
Base Raw Material	Concrete
Governing Manufacturing Standards	All data where relevant manufactured, but not in compliance, to BS EN 1339 : 2003, as the tactility of paving is excluded from the Scope
NBS Specification	Q25 31,Q25 320

Landscape House, Premier Way, Lowfields Business Park, Elland, HX5 9HT Tel: 03704 112233 T: 01422 312000 E: grouptechnicalservices@marshalls.co.uk W: www.marshalls.co.uk/commercial Date Created: 23/11/23

Tactile Blister 400 x 400 x 50

PHYSICAL PROPERTIES		FURTHER INFORMATION					
Work Dimensions (mm)	398 x 398 x 50	Cleaning &	Available on request				
Nominal Dimensions (mm)	400 x 400 x 50	Maintenance					
Tolerances on Work Dimensions (mm)	Length ±2mm, width ±2mm, thickness ±3mm	Efflorescence	Any product containing cement during its early life may exhibit a temporary white discolouration known as efflorescence. This i not a product fault and will gradually disappea				
Abrasion Resistance (mm)	≤ 23mm (Wide Wheel Abrasion Test)						
Durability (Freeze-thaw)	≤ 1.0 kg/m² as a mean with no individual value > 1.5 kg/m²		with exposure to natural weathering and trafficking				
Material Density	2300 kg/m³ (typically)	Weathering	It should be appreciated that with all product weathering and site conditions can cause				
Slip/Skid Resistance (polished)	Mean polished skid resistance value (PSRV) : > 45		shade variation to appear across the surface of individual units. This does not in any way				
Slip/Skid Resistance (unpolished)	Mean unpolished skid resistance value (USRV) : > 45		affect the performance of the units and any such variation will diminish over a period of time on the product matures.				
Thermal Conductivity (K value)	Design data as defined to BS EN 13369 : 2013	Product Evolution	time as the product matures. The evolution of new product design is continuous and information is subject to				
Bending Strength MPa	Characteristic bending strength of 4.0 MPa with no individual result less than 3.2 MPa		change without notice. Customers should check with the supplier to ensure that they have the latest details. Marshalls reserve th				
SPECIFICATION			right to amend the technical information as deemed necessary and in accordance with the				
Approx unit weight (kg)	19		relevant national and international standard				
Emission of Asbestos	sion of Asbestos No content		without notice				
External Fire Performance	Deemed to satisfy. See commission decision 2000/553/ ECU	Contact Us	For technical information on the design, specification and construction when utilising the product, contact Group Technical Service on 0370 411 2233				
Reaction to fire	Class A1, see commission decision 2000/605/EC						
SUSTAINABILITY							
Breeam	These units can achieve an "A" rated system when used in conjunction with the correct sub- base components						
Carbon Footprint	13 kg CO2 m²						
APPLICATION							
Loading Classification	Category 1 - Pedestrian and domestic driveways						
SITE WORKS							
Coverage	6.25 no per m ²						
SUPPLY							
Av. Pack Size m2	5.8						
Units Per Pack	36						
Av. pack weight (kg)	684
