

## Tactile Blister CBP 200 x 133 x 60

In modern, multi-function urban landscapes, crossing points are frequently driven over or parked on, meaning tactile flag paving at crossing points can become damaged. These cleverly designed concrete block paving units are capable of withstanding vehicular overrun from the heaviest loads on the road. The correct nib placement is also maintained to provide tactile guidance for visually impaired pedestrians and ensure DDA compliance. This keeps crossings safe and neat, and can significantly reduce maintenance costs. The blisters have been positioned in such a way that the blocks can be laid in any pattern while still maintaining the correct formation to satisfy BS EN 1339: 2003. The 2 colour options allow for visual identification at crossing points - red for use at controlled crossings, and buff at uncontrolled crossings.

DESCRIPTION	
Appearance	Solid unit with integral spacers
Manufacturing Process	Semi dry pressed & vibrated concrete
Base Raw Material	Concrete
Governing Manufacturing Standards	All data where relevant to be established in accordance with BS EN 1338 : 2003
NBS Specification	Q24 10,Q24 110,Q24 112,Q24 113

# Tactile Blister CBP 200 x 133 x 60

## PHYSICAL PROPERTIES

Work Dimensions (mm)	198 x 131 x 60
Nominal Dimensions (mm)	200 x 133 x 60
Tolerances on Work Dimensions (mm)	Length $\pm 2$ mm, width $\pm 2$ mm, thickness $\pm 3$ mm
Abrasion Resistance (mm)	$\leq 23$ mm (Wide Wheel Abrasion Test)
Durability (Freeze-thaw)	$\leq 1.0$ kg/m <sup>2</sup> as a mean with no individual value $> 1.5$ kg/m <sup>2</sup>
Material Density	2300 kg/m <sup>3</sup> (typically)
Slip/Skid Resistance (polished)	Mean polished skid resistance value (PSRV) : $> 45$
Slip/Skid Resistance (unpolished)	Mean unpolished skid resistance value (USRV) : $> 45$
Thermal Conductivity (K value)	Design data as defined to BS EN 13369: 2013
Tensile Splitting Strength	Characteristic tensile splitting strength not less than 3.6 MPa. None of the individual results shall be less than 2.9 MPa, nor have a failure load less than 250N/mm of splitting length

## SPECIFICATION

Approx unit weight (kg)	3.2
Emission of Asbestos	No content
External Fire Performance	Deemed to satisfy. See commission decision 2000/553/EUC
Reaction to fire	Class A1, see commission decision 2000/605/EC

## SUSTAINABILITY

Breeam	These units can achieve an "A" rated system when used in conjunction with the correct sub-base components
Carbon Footprint	15 kg CO <sub>2</sub> m <sup>2</sup>

## APPLICATION

Loading Classification	Category 5 - 1 large goods vehicle per week (0.015 msa)
------------------------	---

## SITE WORKS

Coverage	38 no per m <sup>2</sup>
----------	--------------------------

## SUPPLY

Av. Pack Size m <sup>2</sup>	7.66
Av. pack weight (kg)	1084
Packaging	All packs are shrinkwrapped onto pallets for fork off-load or crane off-load if necessary

## FURTHER INFORMATION

Cleaning & Maintenance	Available on request
Efflorescence	NA
Weathering	It should be appreciated that with all products weathering and site conditions can cause shade variation to appear across the surface of individual units. This does not in any way affect the performance of the units and any such variation will diminish over a period of time as the product matures.
Product Evolution	Marshall's reserve the right to amend the technical information as deemed necessary and in accordance with the relevant national and international standards without notice. The evolution of new product design is continuous and information is subject to change without notice. Customers should check with the supplier to ensure that they have the latest details
Contact Us	For technical information on the design, specification and construction when utilising the product, contact Group Technical Services on 0370 411 2233
